PORTER'S PRIDE TOMATO

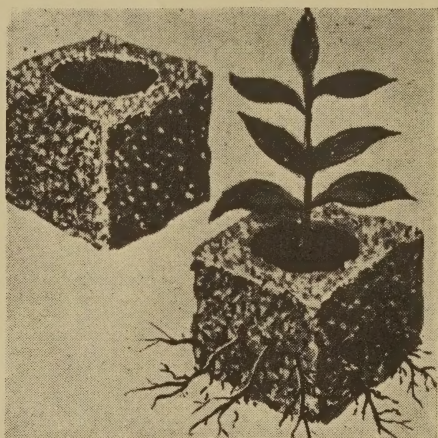

PORTER & SON

SEEDSMEN SINCE 1912

STEPHENVILLE, TEXAS

early . . . **Indoors !**

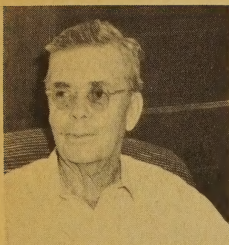

FERTL-CUBES FOR STARTING SEEDS

Use them in the house or garden!

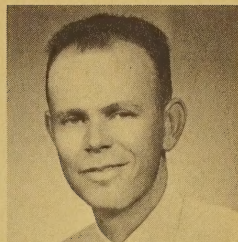

Grow earlier, healthier plants from seeds, by sowing them in these 1-in. cubes of compressed organic plant food and vermiculite. A depression holds 1 or 2 seeds. Fertl-Cubes always stay moist, so seeds germinate rapidly. Seedlings feed continuously on rich, natural plant food in the cubes and develop vigorous, healthy roots. Come transplanting time, put cube and all into the garden . . . plants keep growing without a setback! Fertl-Cubes are clean, easy to use, fit most containers. Their small cost will repay you many times over in bigger, better flowers and vegetables!

B158 Pkg. of 120 cubes. (Wt. 2 lbs.) **4.95**

B152 Pkg. of 40 cubes. (Wt. 1 lb.) **2.00**

GENE PORTER

Better Tomato, Watermelon, Cantaloupe, Vegetable and Flower Seeds —

For more than 40 years it has been our purpose to furnish home gardeners with tomato, watermelon, cantaloupe, vegetable and flower seeds of the highest quality and best varieties available. A continued increase in sales from one year to the next indicates that our seeds prove superior. Every order received, no matter how small, is handled through our own personal attention. May we have the privilege of furnishing you first-class seeds for first-class gardening in 1959? Thank You.

PORTER & SON, Seedsmen
Stephenville, Texas

It Is Easy To Order Your Garden Seeds And Supplies From Us

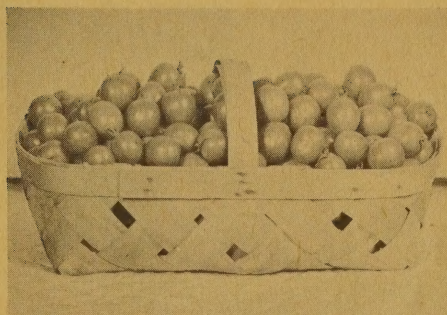

The enclosed order blank is also an envelope for your seed order. It is easy to use and it is safe for sending your payment. After you have read this Seed Catalogue and made out your seed order, fold the order blank back into an envelope, enclosing cash, check or money order (small denomination stamps accepted for orders of less than \$1.00) and mail to us. Within a short time, you will receive your order by prepaid mail, and you will be ready to garden when a fine spring day comes along.

We Pay Postal Charges

We pay postage on all shipments to you. However, due to extra costs to you, and delays in filling orders, we cannot make C.O.D. shipments. Please enclose correct payment for your order, and BE CERTAIN that your name and complete address are on your order, so that we can get your seeds to you without delay.

Minimum Orders

Continued increases in costs of handling and shipping orders compel us to make the following request — "Please do not send orders totaling less than 25¢. We will ship orders which total less than this amount, but we will appreciate greatly your cooperation in this request. Thank You."

PORTER TOMATO

PORTER'S PRIDE TOMATO

PORTER'S GIANT WATERMELON

PORTER'S TRIUMPH TOMATO

HOME GARDENING is a healthful, satisfying and profitable project which can often reduce the family grocery costs considerably, and can be enjoyed by the entire family. Fresh vegetables from the home garden exceed shipped-in produce in both quality and flavor, and home grown flowers are most decorative and satisfying. A small, well-worked garden will actually "pay its way," as well as offering an ideal hobby. Where more space is not available, a sizeable flower bed provides a very suitable garden spot.

WARRANTY: Successful gardening depends to a great extent upon care, soil and climatic conditions, even with the best seeds available. **PORTER & SON**, Seedsmen warrants, to the extent of the purchase price, that seeds sold are as described, within recognized tolerances. We give no further warranty, expressed or implied.

PORTER TOMATOES

— TOMATO SEED —

PORTER'S PRIDE TOMATO

Porter's Pride Tomato (Improved Porter)

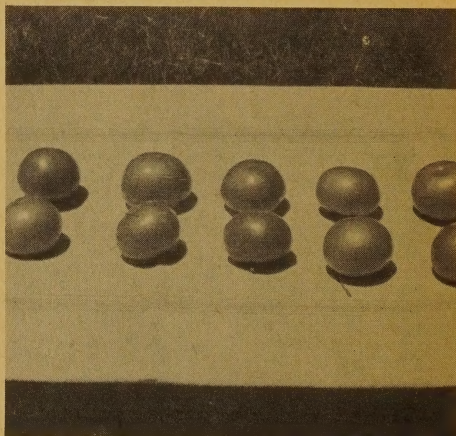

Porter's Pride Tomato is an ideal variety for home gardens and for summer and fall marketing. Medium sized fruits of excellent quality and flavor are very firm and have the best keeping qualities of any tomato. Scarlet-red fruits of uniform size and shape are smooth and meaty and very flavorful.

Indeterminate vine growth is vigorous, very productive, and provides good shading for

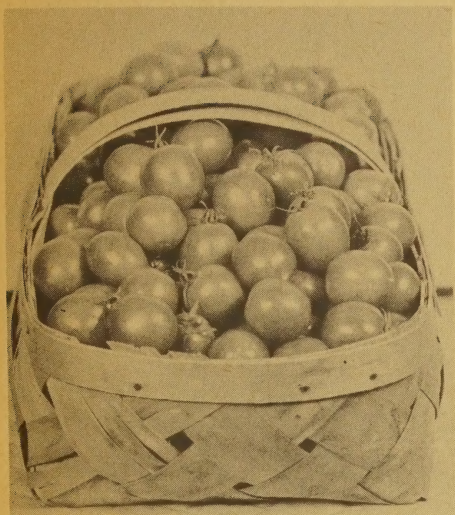

fruits. Production will continue until fall frosts kill the plants. Green tomatoes picked just before frost damage, can be stored for later use, often providing fresh tomatoes as late as the years end. Porter's Pride, like Porter Tomato, can be started from seed much later than most varieties, and still produce late summer and fall tomatoes. Don't fail to plant Porter's Pride for successful tomato growing. Pkt. 25¢; $\frac{1}{2}$ oz. 60¢; 1 oz. \$1.00; $\frac{1}{4}$ lb. \$3.00; $\frac{1}{2}$ lb. \$5.50; 1 lb. \$10.00.

PORTER'S PRIDE TOMATO

PORTER'S PRIDE TOMATO

PORTER TOMATO
(The Old Reliable)

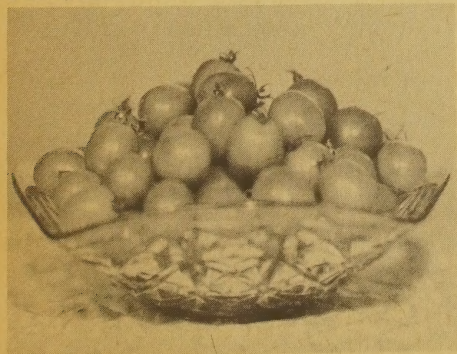

Porter Tomato

Our Porter Tomato is sure to make a good crop, no matter how hot and dry, nor how poor the soil, and it will continue to bear until frost in the fall. As tomatoes are picked, more come on the vine to ripen out to an even, bright red color, and then are replaced by still more tomatoes.

Fruits are always smooth and never have hard cores. They ripen evenly from end to end and do not sunburn nor crack open. Flavor is excellent, and is not affected by hot, dry weather. Flesh is firm and solid, and does not "munge up" in cooking. For this reason, Porter Tomato is unbeatable for making preserves and thick, fruity juice.

Porter Tomato produces well on any kind of soil, even where other kinds often fail completely. Undoubtedly, it is the most certain to make tomatoes all season under unfavorable growing conditions. A dozen vines, well cared for, will make all the fresh tomatoes that the average family will use.

Fruits are about the size and shape of a pullet egg. For a sure crop of fresh, fine flavored tomatoes all season, be certain to include this variety in your seed order. Pkt. 15¢; ½ oz. 60¢; 1 oz. \$1.00; ¼ lb. \$3.00; ½ lb. \$5.50; 1 lb. \$10.00.

PORTER TOMATO

PORTER'S TRIUMPH TOMATO

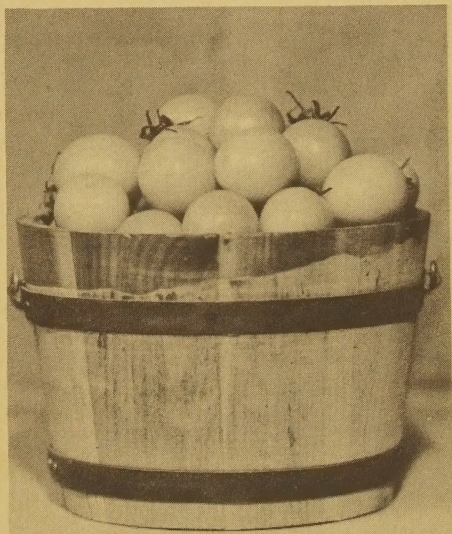

Porter's Triumph Tomato

Fruits are large, flesh is firm and meaty, bright red all through and of excellent flavor, with very few seeds. The mildness of Porter's Triumph enables persons who cannot eat other kinds to enjoy fresh tomatoes without bad effects.

Vine growth is healthy, but very short branching, thus requiring less space in the garden row than large-vining varieties. Triumph is among the very earliest producers, and will continue to make tomatoes, if conditions are at all favorable. A fine, early, large-fruited variety for home use and local market. Pkt. 25¢.

Control of Blister Beetles in Tomatoes

Tomato plants can be completely stripped of foliage within a short time by blister beetles. At first indication of damage, spray or dust with Methoxychlor. This will also give complete control of other common tomato insects.

PORTER'S YELLOW TOMATO

Porter's Yellow Tomato

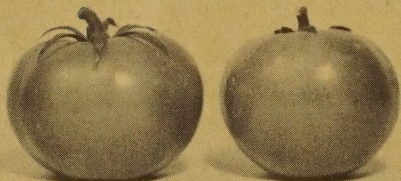

Exactly like Porter Tomato, except fruits are bright yellow. Has all the good qualities of earliness, hardness, heavy yield, long bearing, fine flavor and long-keeping for which Porter Tomato is famous. Porter Tomato and Porter's Yellow Tomato are fine and very attractive when used together in salads. Pkt. 15¢.

RED CLOUD TOMATO

Red Cloud Tomato

Medium to large crimson red tomatoes are reasonably smooth and uniform, and keep reasonably well after picking, though not as well as some other varieties. Not adaptable to long-distance hauling. Vine growth of Red Cloud is very compact, and although foliage is sparse, fruits do not sunburn badly. After fruiting begins, the vines seem to "turn to tomatoes." For very early tomatoes under adverse growing conditions, Red Cloud is a fine variety. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50; 1 lb. \$7.50.

WESTERNRED TOMATO

Westernred Tomato

Fruits are medium sized, orangy-red in color, and ripen medium early. Medium sized, determinate growing vines produce an enormous amount of fruits in hot, dry weather. In areas where growing conditions do not favor tomato growing, Westernred is a very dependable variety. Pkt. 25¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75.

Bison Tomato

Fruits are very large, bright red, solid, sweet and have very few seeds. Vine growth is compact and produces very early tomatoes which are fine flavored. A good slicing tomato. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

Bonny Best Tomato

A medium early variety. Fruits are of medium size, good quality, smooth, solid and uniform, scarlet red. A good variety for home garden, local market and shipping. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

BREAK O' DAY TOMATO

Break O'Day Tomato

Fruits are large, smooth, solid and have few seeds, bright red and fine flavored. Ripens almost as early as Earliana, fruits are larger, more uniform, better keeping and do not crack or sunburn badly. Vine growth very vigorous, resistant to fusarium wilt and nail rust. Break O'Day is a fine tomato for home garden and commercial production. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

Burpee Hybrid Tomato 6113

Outstanding for quality and rich flavor of fruits. Scarlet red, globular shaped, firm, meaty tomatoes. Vigorous, heavy yielding vines. These seed are furnished us by W. Atlee Burpee Company, the originator of this variety. Pkt. (30 seed) 35¢; $\frac{1}{4}$ oz. \$6.00; $\frac{1}{2}$ oz. \$11.00; 1 oz. \$20.

Burpee Jubilee Tomato

A medium early tomato producing orange colored fruits which are solid and meaty and fine flavored. Seeds furnished us by W. Atlee Burpee Company, the originator of this variety. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢.

Dwarf Champion Tree Tomato

Dwarf in plant growth only. Short, thick foliaged, self supporting plants have a tree-like appearance. Nice for growing in home gardens and flower beds, but not a very heavy producer. Large, pink, meaty tomatoes of good flavor. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75.

Earliana Tomato

An early producing variety with medium sized fruits which are smooth, solid and well flavored. Tomatoes are scarlet red. This is an old variety but is still a good early tomato which is planted in many home gardens. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

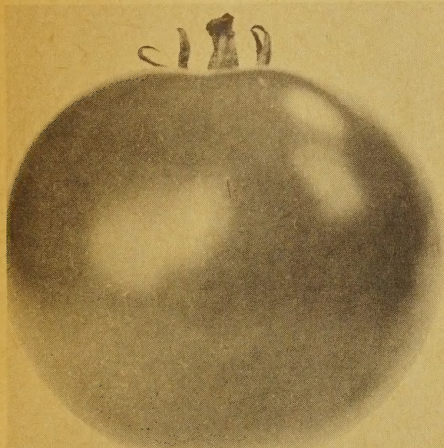

EARLY DELICIOUS HYBRID

Early Delicious Hybrid Tomato

Can you imagine having ripe tomatoes 55 days after transplanting? Under favorable conditions, Early Delicious Hybrid will produce ripe tomatoes in less than two months after transplanting plants to garden. Tomatoes are medium large in size, dark red, smooth and uniform, thick fleshed and fine flavored. Free from cracking. Vine growth of indeterminate habit is strong and vigorous. Hybrid vigor of Early Delicious Hybrid makes it an outstanding variety for home use or commercial growing. Pkt. (30 seed) 35¢; ¼ oz. \$6.00; ½ oz. \$11.00; 1 oz. \$20.

Golden Queen Tomato

Large, golden yellow tomatoes are very mild flavored. A moderately heavy producer of early, attractive, yellow tomatoes. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢; ¼ lb. \$2.75.

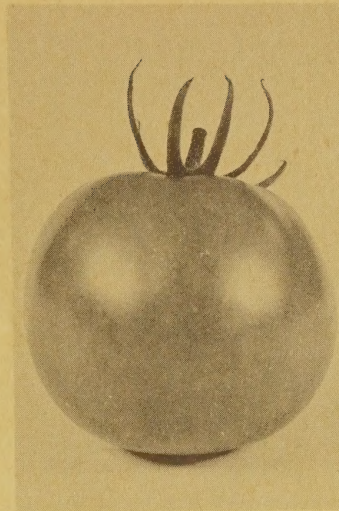

NEW WONDER BOY HYBRID TOMATO

New Wonder Boy Hybrid Tomato

New Wonder Boy Hybrid is an outstanding, mid-season, home garden variety. Vigorous, large, sprawling indeterminate vines provide good foliage protection, and produce high yields. Scarlet-red fruits, often weighing a pound or more, are almost round, firm, smooth and of excellent quality and flavor. Hybrid vigor of this variety is very evident. You will be well pleased with this new hybrid tomato. Pkt. (30 seed) 35¢; ¼ oz. \$6.00; ½ oz. \$11.00; 1 oz. \$20.

Gulf State Market Tomato

A medium early producer of pink tomatoes which are smooth, solid and meaty. Vigorous plants of medium height. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢; ¼ lb. \$2.75.

GULF STATE MARKET TOMATO

Homestead Tomato

A recently introduced variety for home gardens, local market and shipping. Homestead is resistance to fusarium wilt. Vine growth is semi-determinate, varying with local growing conditions. Fruits are medium sized, very similar to Rutgers in shape and color (bright red), but mature a few days earlier than Rutgers. Tomatoes are solid and firm. Plants very good producers of quality fruits. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢; ¼ lb. \$2.75; ½ lb. \$4.50

A Word About Seed Disinfection

Seed disinfection is the process of treating seeds before planting with either a dust or liquid disinfectant to prevent damage to seedlings by certain diseases. It gives very good control of damping-off of seedlings. Usually, stands are greatly increased and seedlings are sturdier when seeds are treated. This cost is very small and seed treating is very easily done. After using seed disinfectants for many years in our own plantings, we believe it very profitable to every good gardener and good crop insurance.

PAN AMERICA TOMATO

Pan America Tomato

Medium sized tomatoes are bright red with thick, meaty walls. This variety is highly resistant to fusarium wilt. Reasonably prolific, vigorous vine growth. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

PEARSON TOMATO

Pearson Improved Tomato

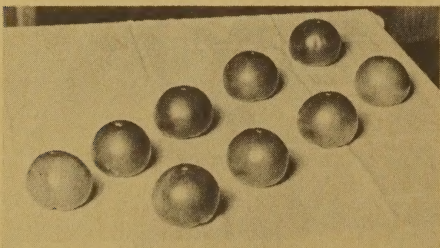

Medium sized, globe shaped, bright red fruits are very smooth and free of cracks. Vigorous, self topping plants are moderately heavy producers, with ample foliage to protect fruits. A very good variety for home gardens, local market and shipping. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

PONDEROSA TOMATO

Pink Ponderosa (Beefsteak) Tomato

Probably the largest fruited of all tomatoes. Plant growth is large, fruits are large and somewhat flattened, pink in color, solid and fine flavored. This variety is interesting to grow because of the unusual size of the fruits. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

PRITCHARD TOMATO

Pritchard (Scarlet Topper) Tomato

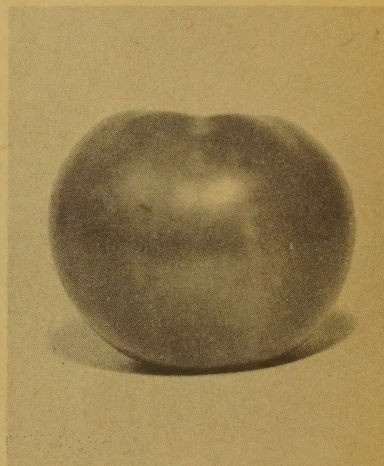

A medium early variety producing bright red, smooth, solid, medium sized fruits. Low growing vine with heavy foliage is resistant to fusarium wilt. A very well known variety which is popular with many good gardeners. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

RUTGERS TOMATO

Rutgers Tomato

An exceptionally popular all-purpose variety. Fruits are globular, thick-walled, bright red, medium to large in size, with small seed cavities. Vigorous plants have sturdy stems and dense foliage which protects fruits from sunburn. Resistant to fusarium wilt. Ripe tomatoes 70 to 80 days from transplanting. Fine for home garden and local market as well as shipping. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

SUPER SIOUX TOMATO

Super Sioux Tomato

A medium early variety producing many medium sized tomatoes of good quality. Indeterminate, sprawling vine growth. Fine for home gardens. Globular shaped fruits are thick walled, free from hard core, juicy with a good acid flavor. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

Stokesdale Tomato

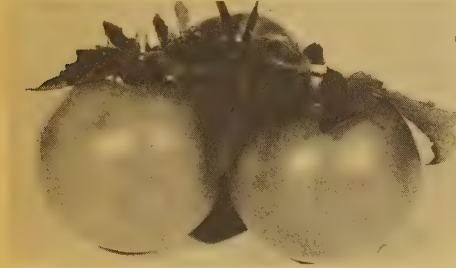

Smooth, solid, scarlet red fruits are of medium size, fine flavored, firm and uniform. Vigorous, heavy yielding vines are medium early producers. Stokesdale is very widely adapted for commercial growing. Pkt. 15¢; $\frac{1}{2}$ oz. 45¢; 1 oz. 80¢; $\frac{1}{4}$ lb. \$2.75; $\frac{1}{2}$ lb. \$4.50.

John Baer Tomato

A medium early variety producing round, medium sized fruits which are moderately smooth, scarlet red. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢; ¼ lb. \$2.75; ½ lb. \$4.50.

June Pink Tomato

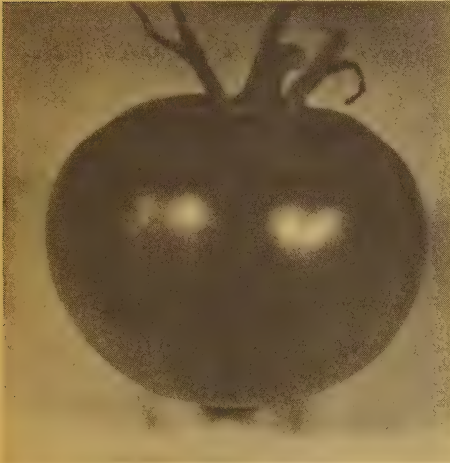

An early, medium sized, pink-fruited variety with uniformly smooth fruits. Plant growth medium to large. Very similar to Earliana except in fruit color. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢; ¼ lb. \$2.75; ½ lb. \$4.50.

MARGLOBE TOMATO

Marglobe Tomato

A widely used, medium early variety. Smooth, Scarlet red, medium sized fruits. Plants are resistant to fusarium wilt and nail head rust. A very popular all-purpose variety. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢; ¼ lb. \$2.75; ½ lb. \$4.50.

TEXT 2 TOMATO

Text 2 Tomato

Produces a considerably larger yield than Rutgers, often 50 percent or more. Fruits are similar to Rutgers in color and size and ripen out equally well. Plants are vigorous, resistant to fusarium wilt, and less affected by blossom-end rot and stem cracking than many well known varieties. Semi-determinate vine growth provides ample foliage for sunburn protection. Medium sized fruits are firm, bright red, smooth and uniform. A fine home garden, green-wrap or local market variety. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢; ¼ lb. \$2.75; ½ lb. \$4.50.

BURGESS TRIP-L-CROP TOMATO

Trip-L-Crop Tomato

The tomato that you have seen advertised to "grow 18 to 20 feet high and produce 2 bushels per vine." Trip-L-Crop is a fine variety to grow in flower beds or garden, where intensive work can be given in caring for plants. Solid, meaty, bright red fruits with small seed cavities. Pkt. 15¢; ½ oz. \$1.00; 1 oz. \$1.50.

Valiant Tomato

Valiant is almost as early as Earliana, a few days earlier than Stokesdale. Vigorous, productive vines offer adequate sunburn protection. Fruits are large, solid, smooth and meaty, bright scarlet red in color. A fine variety for early market and home use. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢; ¼ lb. \$2.75; ½ lb. \$4.50.

WESHAVEN TOMATO

Weshaven Tomato

Indeterminate, sprawling vine growth with good foliage for fruit protection. Plants are highly resistant to fusarium wilt. Fruits are large, deep globular, firm and ripen evenly to bright red color, smooth on both stem and blossom end. Will equal or better Text 1 in production. A highly recommended commercial variety. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢; ¼ lb. \$2.75; ½ lb. \$4.50.

Yellow Pear Tomato

A small, yellow fruited variety bearing pear shaped fruits. Vigorous growing vines. A fine variety for preserving. Pkt. 15¢; ½ oz. 45¢; 1 oz. 80¢.

PORTER'S GIANT WATERMELON

PRIDE O' TEXAS WATERMELON

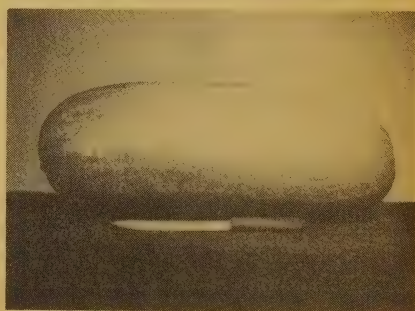

TENDERSWEET WATERMELON

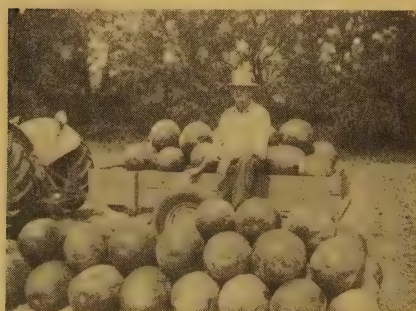

PORTER'S GIANT WATERMELON

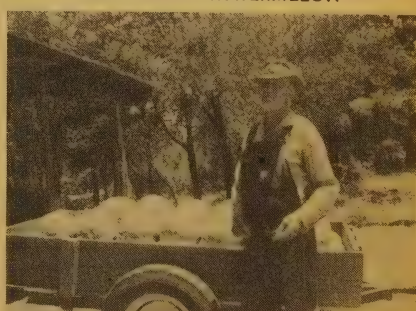

CHRIS-CROSS WATERMELON

IRISH GRAY WATERMELON

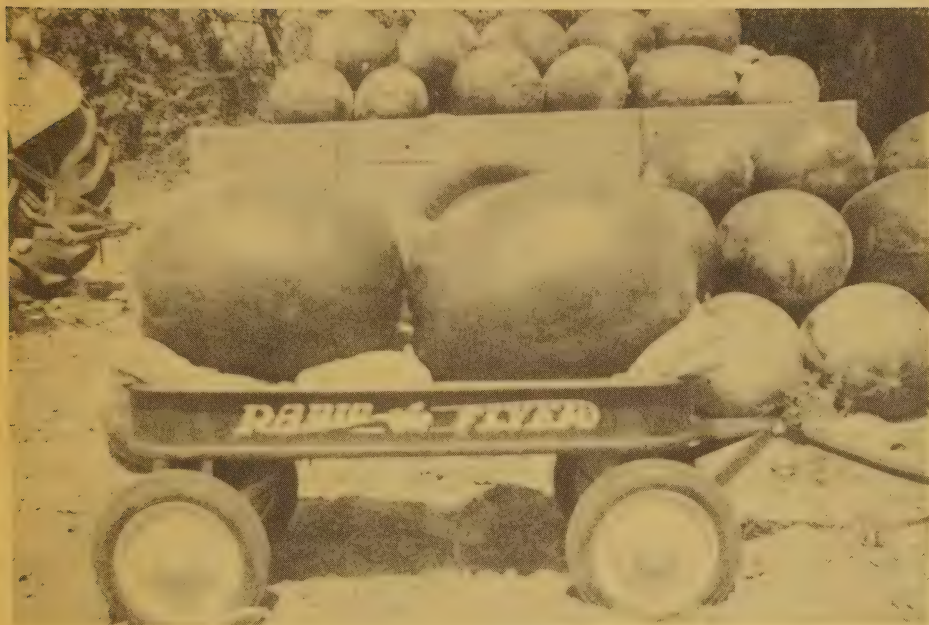

"A NICE LOAD"

CHRIS-CROSS WATERMELON

— WATERMELON SEED —

PORTER'S GIANTS

Porter's Giant Watermelon

Vines are vigorous growing and set many melons which will grow to very large size under favorable conditions. Melons are slightly oblong in shape with dark, glossy-green rind that is tough and stands up well to local hauling and long-distance hauling. Flesh is fine textured, bright red and very sweet. Although it is a large melon, quality has not been sacrificed for size. Flesh is not tough or coarse like many other large varieties, and it does not cut white hearted. Under favorable growing conditions, Porter's Giant will grow to 80 pounds or better, with average ranging 35 to 40 pounds.

Our crop is grown strictly for seed production and is handled very carefully from planting time until seeds are harvested. No melons are sold from our fields. Favorable reports every season indicate that Porter's Giant Watermelon is truly a fine variety for home use and commercial growing.

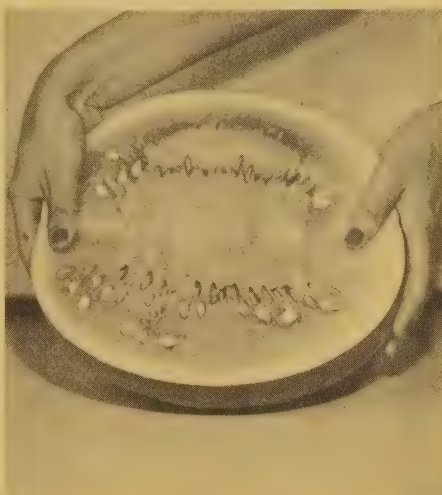

Commercial growers fully realize the advantages of planting Porter's Giant Watermelon for successful production of top-quality melon crops. In order to produce the very best grade of melon seed, we limit our acreage so that a close check of the crop may be maintained at all times. The better quality of Porter's Giant Watermelon in the big-melon class always shows up at marketing time. We hope that you will order your seed of this variety early, so that we will be able to fill your order. The past several years, our stock has sold out long before planting time. Pkt. 15¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{2}$ lb. \$2.25; 1 lb. \$3.50; 2 lbs. or more, \$3.00 per pound.

Pride O' Texas Watermelon

The increased demand for smaller melons for home use and the excellent qualities of Pride O' Texas have created a fast-growing demand for this variety. Pride O' Texas is just about the "perfect" family melon and is also a good

local market melon. Quality is superior to many of the other smaller varieties. If a few hills are planted early, then a few more hills planted every 10 days until June, your family can enjoy good melons all summer.

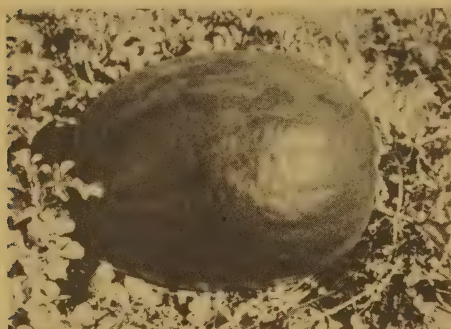

Pride O' Texas melons weigh from 18 to 25 pounds, are perfectly round with a dark green, striped rind that is thin and tough. Flesh is very bright red, crisp and very sweet. Vines are vigorous growing and very productive. For a home melon or local market melon, we highly recommend this variety. Pkt. 15¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{2}$ lb. \$2.25; 1 lb. \$3.50; 2 lbs. or more, \$3.00.

PRIDE O' TEXAS

Blacklee Watermelon

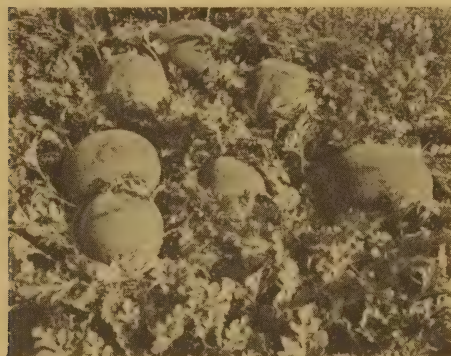

Blacklee was developed for resistance to Fusarium Wilt. Vines are vigorous growing and productive. Melons are medium large, oblong, with dark green rind which is tough enough to make it a good shipping melon. Flesh is bright red, fine textured and sweet. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. 90¢; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.25; 2 lbs. or more, \$2.00 per pound.

Y. B. BLACK DIAMOND

Black Diamond (Yellow Belly) Watermelon

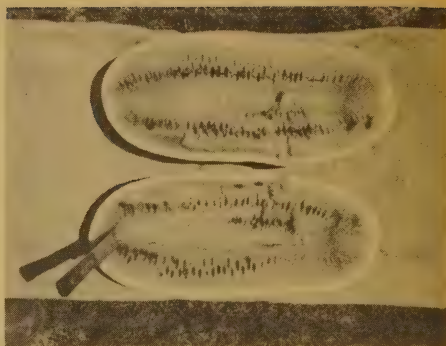

Large, well-shaped, dark blue-black melons which are yellow-bellied where they touch the ground. Melons are slightly oblong, with very definite creases. Rind tough enough for shipping. Under favorable conditions, melons will grow to 50 pounds or better. Bright red flesh is sweet and tender for a large melon. Vine growth is vigorous, providing some protection from sunburn. A fine home, local market and shipping melon. Pkt. 15¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{2}$ lb. \$2.25; 1 lb. \$3.50; 2 lbs. or more, \$3.00 per pound.

BLACKSTONE WATERMELON

Blackstone Watermelon

Blackstone is a recently developed variety of the Black Diamond-Florida Giant type melon which is resistant to anthracnose and apparently tolerant to wilt. Melons are very uniform, slightly oval shaped, with a dark green tough rind which ships and hauls well. Blackstone melons grow to 35 or 40 pounds, cut red and have very good eating qualities. Vines are vigorous and prolific. For diseased fields, Blackstone is increasing in popularity with commercial growers, and is also a good home and local market melon. Pkt. 15¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{2}$ lb. \$2.25; 1 lb. \$3.50; 2 lbs. or more, \$3.00 per pound.

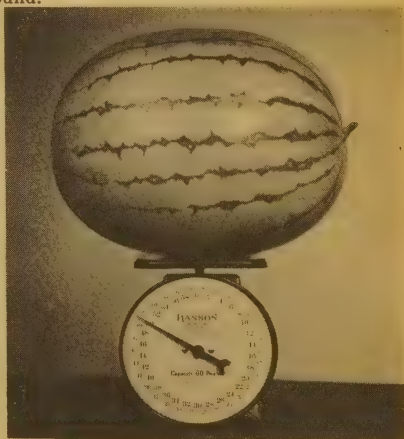

CHARLESTON GRAY

Charleston Gray Watermelon

Charleston Gray Watermelon is a recently released variety which has many good qualities long sought by commercial melon growers. Developed by USDA Southeastern Vegetable Breeding Laboratory, Charleston Gray has been thoroughly tested in Texas and has proved to be a fine melon.

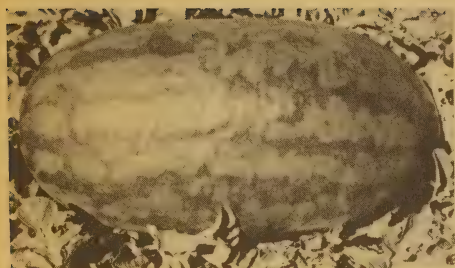

Plants are resistant to fusarium wilt and anthracnose, and are long bearing. Light gray-green, long, blunt ended melons with tough rinds load and ship exceptionally well. Melons are well shaped and sunburn resistant. Some grow to 50 pounds, average 30 to 35 pounds. The smaller melons in a field (18 to 20 pounds) are of good quality. Flesh is bright red, fine textured, sweet and well flavored. Vigorous growing vines continue to put on new melons even under adverse growing conditions. Melons are very attractive in appearance and are fine for home use, local or shipping market. Pkt. 15¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{2}$ lb. \$2.25; 1 lb. \$3.50; 2 lbs. or more, \$3.00 per pound.

CHRIS-CROSS WATERMELON

Chris-Cross Watermelon

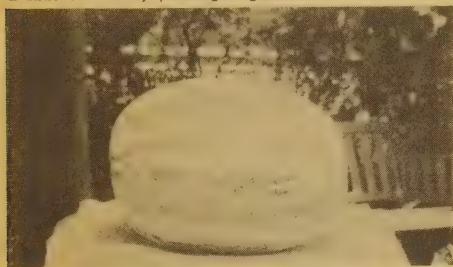

Very vigorous growing vines are resistant to wilt and anthracnose. Melons are light green with dark, irregular stripes, medium to large in size, high quality. Flesh is bright red, tender and sweet, with black seeds. Rind thin and tough and resists sunburn. Chris-Cross is very productive and a fine melon for home use and local market. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

CONGO WATERMELON

Congo Watermelon

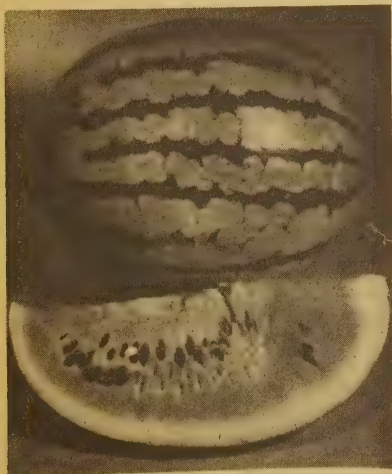

A fine variety which is partially resistant to anthracnose. Congo produces melons which are long in shape, rind is dark green with lighter stripes, tough enough to make it a good shipper. Flesh is bright red, crisp and sweet. Melons weigh 30 to 40 pounds. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. 90¢; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.25; 2 lbs. or more, \$2.00 per pound.

DIXIE QUEEN WATERMELON

Dixie Queen Watermelon

A fine variety for home use and local market. Vines are resistant to fusarium wilt, vigorous growing and producers of medium sized melons which are slightly oblong with thin, tough rind of light green with dark green stripes. Flesh is bright red, fine textured and sweet. Grows to about 30 pounds. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

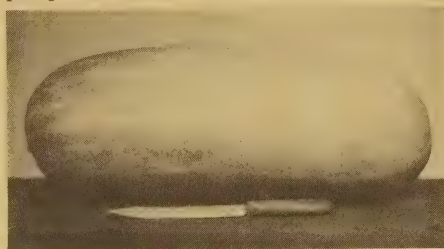

DIXIE QUEEN HYBRID WATERMELON

FAIRFAX WATERMELON

Fairfax Watermelon

A good shipping variety which is resistant to fusarium wilt and anthracnose. Very similar to Garrison in appearance and fine quality. Alternate dark and light green striped rind which is tough enough to stand long distance hauling. Flesh is bright red, fine textured and sweet. A good commercial variety as well as home use. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more \$2.50 per pound.

IRISH GRAY WATERMELON

Irish Gray Watermelon

Melons are long, light gray-green rind is very tough. Sometimes grows to 60 pounds, with average weight 40 pounds under good conditions. Flesh is bright red, firm and very sweet. This is a fine watermelon for home use or local market. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.25; 2 lbs. or more, \$2.00 per pound.

Florida Giant Watermelon

A very good all-purpose watermelon. Vines are very vigorous and productive. Melons are dark green, large, slightly oblong. Flesh firm, bright red and of good quality. Thick rind withstands long distance hauling; very popular as a shipping melon. Grows to 40 to 50 pounds. Pkt. 15¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{2}$ lb. \$2.25; 1 lb. \$3.50; 2 lbs. or more, \$3.00 per pound.

Dixie Queen Hybrid Watermelon

Rind is very thin and tough, light green with dark green, irregular stripes. Melons grow to 30 to 50 pounds, with deep red, fine textured, sweet flesh. Vines are vigorous and fusarium wilt resistant. Hybrid vigor is very evident in this first generation, hand pollinated strain. Pkt. (40 seed) 50¢; 3 pkts. \$1.25.

Garrison Watermelon (Darlington)

Melons are large, oblong, irregular dark and light green alternating stripes. Flesh bright red, sweet and tender. Garrison is very similar to the old-time Rattlesnake, but greatly improved. Grows to 40 pounds. A good home garden and local market melon. Pkt. 15¢; oz. 40¢ $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

KLECKLEY SWEET WATERMELON

Kleckley Sweet Watermelon

Melons grow to about 30 pounds, oblong, dark green with thin, reasonably tough rind. Flesh is bright red, crisp, tender and sweet. Good home garden and local market melon. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. 90¢; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.25; 2 lbs. or more, \$2.00 per pound.

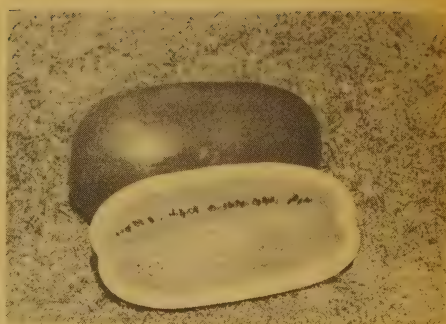

NEW HAMPSHIRE MIDGET WATERMELON

New Hampshire Midget Watermelon

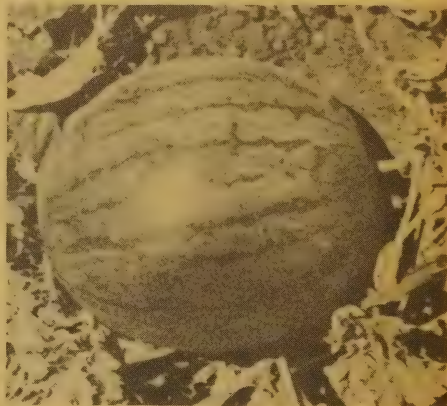

Small vines produce many melons weighing 4 to 6 pounds. Melons are oval shaped, light mottled-green with thin rind. Flesh is solid and sweet, bright red. Very early. This is a favorite ice-box variety. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

Peacock Improved Watermelon

Peacock is a home garden and market melon which is grown extensively in California and Arizona, and is rapidly gaining popularity in Texas. Melons are oblong with a thick, tough rind; very suitable for shipping. Rind dark green, flesh deep red, sweet and fine textured. Grows to about 20 pounds. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

IMPROVED PEACOCK WATERMELON

SUGAR BABY WATERMELON

Sugar Baby Watermelon

An early maturing, ice-box type melon of excellent quality. Grows from 8 to 10 pounds, almost perfectly round. Rind dark green with slightly darker stripes, thin and hard. Flesh bright red, fine textured and of extremely fine flavor. A fine home garden and local market melon of the ice-box type. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

TOM WATSON WATERMELON

Tom Watson Watermelon

An old-timer that is always popular. This strain is an improvement of the original Tom Watson. Melons are oblong, tapering at ends. Thin, tough rind makes it an excellent shipper and the uniform shape makes it easy to load. Flesh is juicy and sweet, fine grained, deep red in color. Melons grow from 40 to 50 pounds. Tom Watson is a fine variety for home use, local or shipping market. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

10 Kinds Watermelon

Not suitable for market crops, but fine to grow for home use. Seed of 10 or more different varieties which produce melons of all descriptions — yellow, red and orange meated, long, round, large and small. Very interesting to watch these melons grow. Pkt. 15¢; oz. 35¢ ¼ lb. 90¢.

ORANGE FLESH TENDERSWEET WATERMELON

Orange Flesh Tendersweet Watermelon

For many years Tendersweet has been a leading variety among yellow meated melons, and a favorite with many growers. Here is a more recently developed strain which grows larger than the regular Tendersweet, and withstands severe growing conditions. Melons are oblong, with mottled stripes running from end to end. Rind tough enough for hauling. Flesh is bright orange, crisp and very sweet. A fine variety for home use, local market and trucking. Pkt. 15¢; oz. 40¢; ¼ lb. \$1.00; ½ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

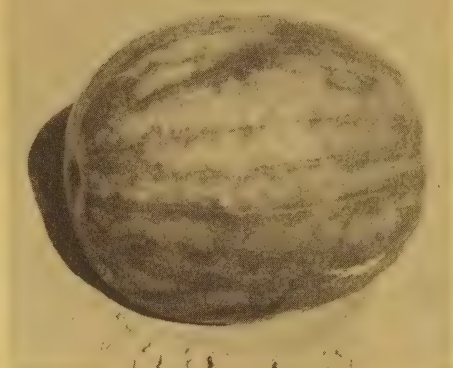

DESERT KING WATERMELON

Desert King Watermelon

Bright, golden-yellow flesh is crisp and fine textured, and very sweet. Medium thick, light green rind stands up well to hauling and rough handling. Melons grow to medium size, slightly oblong in shape. Cuts good and is a fine yellow meated melon for home use and

marketing. Pkt. 15¢; oz. 40¢; ¼ lb. \$1.00; ½ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

GOLDEN HONEY WATERMELON

Golden Honey Watermelon

A fine home garden variety. Dark green rind is irregularly striped with darker green. Flesh bright yellow, very sweet. Grows to 25 pounds. Pkt. 15¢; oz. 40¢; ¼ lb. \$1.00; ½ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

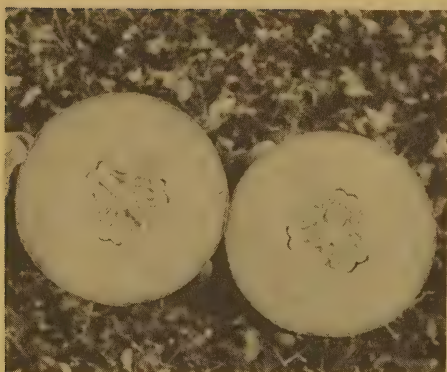

Transplanting Seedlings (Vegetables and Flowers)

Seedling roots should never be disturbed. When transplanting, seedlings should be dug with a small spade, fork or spoon, leaving soil on the roots. If necessary to pull plants, soil should be thoroughly soaked with water. After small plants are set in a new location, they should be watered with one pint of starter solution to help them recover from the shock of transplanting and to settle the soil around roots. A good started solution can be made as follows: add ½ pound of commercial fertilizer (5-10-5) to 4 gallons of water, stirring occasionally for 10 minutes. Water each plant with this solution. Do not splash this starter solution on stems or leaves, as plants may be burned by the fertilizer. HYPONEX PLANT FOOD makes a very good starter solution, and it is easy to prepare. Simply dissolve 1 level teaspoon of HYPONEX in 1 gallon of water and water plants. When mixed according to directions, HYPONEX will not burn plants. Watering plants once daily for the next 3 days will help them to get a good start. Transplanting should be done late in the afternoon or on a cloudy day. This will save the work of shading plants.

Transplanting always causes a set-back in plant growth, even when carefully done; therefore, all possible precautions should be taken to help reduce this shock to plant growth. Spring or fall transplanting, when the days are short and the nights cool, is much easier done than during the summer months. Summer transplants should be protected from hot afternoon sun by placing a wooden shingle or thin board on the west side of each plant.

These ideas apply to flowers as well as vegetables, and will reduce losses at transplanting time.

— CANTALOUPE SEED —

RIO GOLD CANTALOUPE

Rio Gold Cantaloupe

Fruits are of extremely high quality. Orange colored flesh is thick and tender to the rind, very sweet and very fine flavored. Seed cavity is small. Vigorous, large leaved vines are very productive, resistant to downy mildew and fairly resistant to powdery mildew and aphids. Rio Gold will stand up in long distance hauling and has very good color at harvest. Fruits medium to large, well netted. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.30; $\frac{1}{2}$ lb. \$2.00; 1 lb. \$3.00; 2 lbs. or more, \$2.75 per pound.

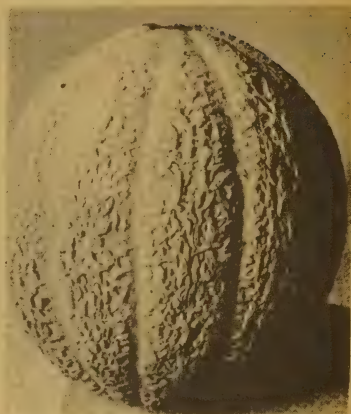

RIO SWEET CANTALOUPE

Rio Sweet Cantaloupe

Cantaloupes are slightly oval in shape, well netted, yellow-green colored at maturity. Flesh is unusually thick, firm but not tough, bright apricot in color, with a thin green border just beneath the rind. Flavor is excellent, very sweet. The thick, firm walls make it suitable for shipping. By pulling when $\frac{3}{4}$ ripe, fruits will reach destination in good condition. Vines are resistant to downy mildew, and partially resistant to aphids. Rio Sweet is an excellent cantaloupe for home use, local market or shipping. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.30; $\frac{1}{2}$ lb. \$2.00; 1 lb. \$3.00; 2 lbs. or more, \$2.75 per pound.

Super Market Hybrid Cantaloupe

Large, thick fleshed, firm, delicious fruits measuring up to 7 inches long, weighing 4 to 5 pounds. Seed cavity small. Tough rind is well netted and ribbed, and holds up well. High yielding, vigorous vines are resistant to fusarium wilt and downy mildew. Pkt. (40 seed) 50¢; 3 pkts. \$1.25.

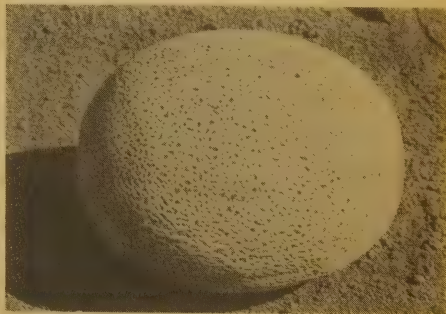

SUPER MARKET HYBRID CANTALOUPE

TEXAS RESISTANT NO. 1 CANTALOUPE

Texas Resistant No. 1 Cantaloupe

Texas Resistant continues to be a very popular home garden cantaloupe. Vines are vigorous growers with good foliage, and very productive. Fruits are oval shaped, medium sized, slightly ribbed and closely netted. Flesh is salmon colored, thick and very sweet. Partially resistant to honey dew and mildew. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

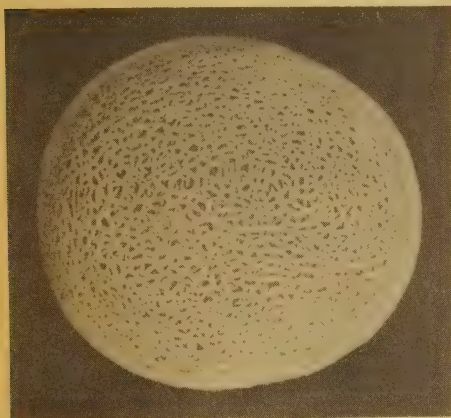

HALES BEST NO. 36 CANTALOUPE

Hales Best No. 36 Cantaloupe

A very early shipping and home garden variety. Fruits are uniform, firm, almost round with heavy netting, very slightly ribbed. Small seed cavity, thick, solid, salmon flesh of excellent flavor. Vine growth vigorous and productive. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

Honey Rock Cantaloupe

Medium early, heavy producer of large, tasty cantaloupes. Deep, thick salmon flesh is sweet, juicy and firm. Slightly ribbed with thin, coarse net. A good variety for home use and local market. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. 90¢; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.25; 2 lbs. or more, \$2.00 per pound.

NO. 45 RESISTANT CANTALOUPE

P.M. Resistant No. 45 Cantaloupe

A fine cantaloupe which was developed especially for its resistance to powdery mildew. Heavily netted fruits are solid with a small seed cavity. Thick, salmon colored flesh is firm and tasty. Thick walls make it a fine shipping variety. Vigorous growing vines are very productive. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. 90¢; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.25; 2 lbs. or more, \$2.00 per pound.

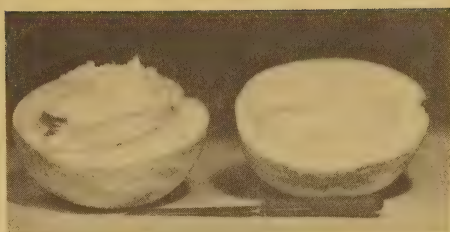

ROCKY FORD

Rocky Ford Cantaloupe

Extra early, medium sized, uniform fruits with green tinted flesh which is sweet, fine flavored and never stringy. Vines are very productive. This is the old, original green-fleshed strain of Rocky Ford. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. 90¢; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.25; 2 lbs. or more, \$2.00 per pound.

Edisto Cantaloupe

A recently developed variety which has good resistance to alternaria and powdery mildew and tolerance to downy mildew. Plants are heavy yielding. Fruits are larger than Hales Best Jumbo, ripen about one week later. Thick flesh is deep, rich salmon, high in sugar content. Rind hard at full slip, making this a good shipper which keeps well. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.30; $\frac{1}{2}$ lb. \$2.00; 1 lb. \$3.00; 2 lbs. or more, \$2.75 per pound.

COB MELON

Cob Melon

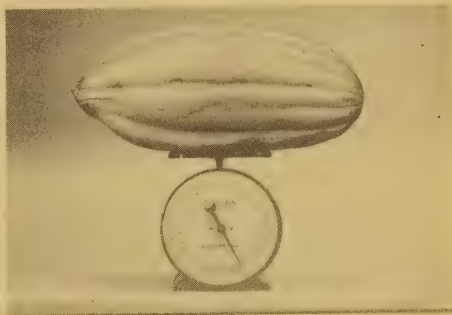

Vines are large-leaved, vigorous growing and very prolific with fruits larger than most cantaloupes. Flesh is almost snow-white, sweet and fine flavored, and almost the texture of ice cream. The thick walls fill the inside entirely to the "cob" of seed so that there is no hollow cavity inside. Flesh is so tender that this melon cannot be shipped but is fine for home use and local market. Don't fail to grow some Cob Melons in your garden this year. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.30; $\frac{1}{2}$ lb. \$2.00.

GOLDEN BEAUTY CASABA

Golden Beauty Casaba

A home garden and local market variety. Fruits large, golden yellow with tough, wrinkled rind. Flesh thick, white and spicy. Keeps well in storage. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.30; $\frac{1}{2}$ lb. \$2.00; 1 lb. \$3.00; 2 lbs. or more, \$2.75 per pound.

LETHA

Letha Giant Cantaloupe

This variety is truly the "giant" of muskmelons. Fruits oval shaped, deeply ribbed, almost smooth skin. Flesh is very tender, quality usually very good. Not tough enough for long distance hauling or shipping. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.30.

BANANA CANTALOUPE

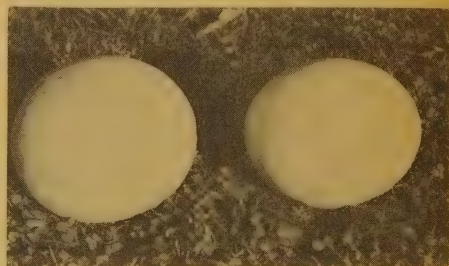

Banana Cantaloupe

Long, slender, banana shaped fruits are creamy yellow, very smooth skinned with slight ribbing. Salmon colored flesh is well flavored. Pkt. 15¢; oz. 40¢; ¼ lb. \$1.30.

Honey Dew Cantaloupe

Perfectly smooth fruits with almost white rind, turning slightly golden when ripe. Flesh

is sweet, very firm. Fruits keep in good condition a long time after ripening. Matures later than other varieties. Pkt. 15¢; oz. 35¢; ¼ lb. \$1.00; ½ lb. \$1.75; 1 lb. \$2.75; 2 lbs. or more, \$2.50 per pound.

HONEY DEW

10 Kinds Cantaloupe

For those gardeners who want all kinds of cantaloupes in one "patch." Seeds of ten or more different varieties of cantaloupes in one packet. Interesting to watch these different varieties grow. Pkt. 15¢; oz. 35¢; ¼ lb. 90¢.

HOW TO PREPARE YOUR GARDEN

Deep spading or plowing (15 to 18 inches or more) is an absolute necessity to successful gardening in areas of low rainfall. It is very beneficial to garden spots where the soil is tight and hard to work. This deep working of the soil allows more rain to soak in for use after the rainy season is over, as well as making much easier the growth of plant roots down deep into the soil. Sandy gardens do not benefit greatly from deep working, unless a hardpan of clay lies below the surface.

Rotation or changing of garden location from year to year is a very good plan, if space permits. If rotation is not practical, it is a good idea to plan your garden so that root crops (carrots, radishes, beets, etc.) do not follow root crops, vine crops (melons, cucumbers, squash, etc.) do not follow vine crops, and leafy crops (lettuce, cabbage, etc.) do not follow leafy crops. This will help to keep down plant diseases, and will keep insects to a minimum.

After fall plowing, the garden can be harrowed off and spring planting done in drills opened by tractor, team, garden plow or hoe. Another method, which we prefer, is to lay off garden in deep furrows as early in the winter as possible, spacing the rows 30 to 36 inches apart. Planting is then done behind a plow which has "busted" these beds open. By leaving the garden bedded all winter, wind and water erosion will be kept down. Plowing out these beds will make a good moist furrow in which to plant.

Methods and time of planting for different crops of vegetables and flowers vary a great deal. Most of these different requirements are familiar to you. Directions on our seed packets will be of great help to the beginning gardener.

STARTING SEEDLINGS INDOORS

There are several vegetables and flowers which are not frost hardy, and must be started indoors early so that they may be transplanted to the garden as soon as possible after frost danger is past. Tomatoes, peppers, and egg plants are better known vegetables which should be started inside. For a few early

plants, cantaloupes, melons, and cucumbers may be started inside, but these cucurbits are difficult to transplant with much degree of success.

A very limited number of plants can be started in flower pots or flats near a south window. However, to grow many plants, a hotbed with artificial heat should be used.

Pots or flats should be filled almost full of soil, sand or potting soil. Place container in a shallow pan of water and leave until enough water has soaked up through drainage holes to moisten the soil to the surface. Sow seed thinly on moist soil, cover very lightly and place in a south window. Placing a flat piece of glass over the container will prevent rapid drying. As soon as seed have sprouted, seedlings should be given as much sunshine and fresh air as possible. Temperatures should be reduced to 50 to 60 degrees F to prevent plants from growing too fast, and becoming weak and spindly. Before plants become crowded, transplant to larger containers.

Treating most vegetable and flower seed before planting will greatly reduce losses from some diseases. Plenty of fresh air and sunshine will also help reduce these losses. Should damping-off get started, it can be controlled by sprinkling seedlings with a solution of 1 teaspoon of Semesan in 1½ quarts of water. Use about 1 quart of this solution per 10 square feet of seedbed. Repeat after several days.

HOW TO PREPARE YOUR FLOWER BEDS

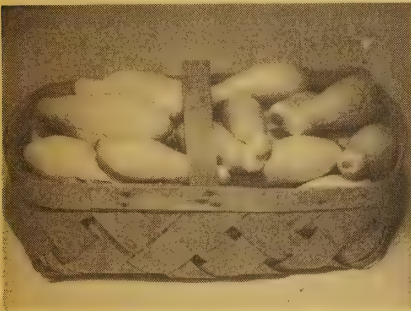

Removal of trash, weeds and rocks is the first step in preparing a good flower bed. Soil should then be spaded 12 inches or more deep, then raked to level the surface and break up any clods. Broadcast commercial fertilizer (4-12-4 or 5-10-15) on soil surface at the rate of 5 pounds per 100 square feet and work into the top 3 inches of soil. Water thoroughly. Flower bed is then ready for planting seed or transplanting seedlings. After spring growth begins, work ½ cup commercial fertilizer into the soil around each plant and water well, or sprinkle with water-soluble fertilizer solution. Soil should be kept mulched and free of weeds at all times.

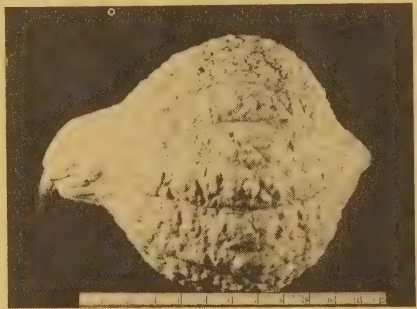

RIO GOLD CANTALOUPE

VELVET SPINACH

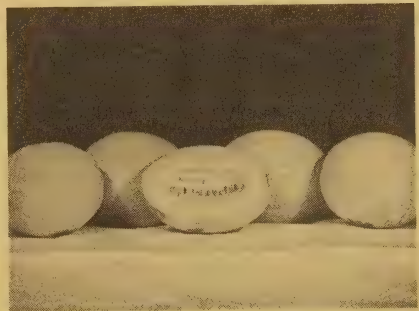

E. P. STRAIGHT NECK SQUASH

BLUE HUBBARD SQUASH

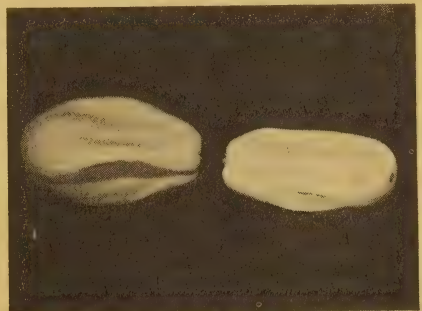

RIO SWEET CANTALOUPE

TEXAS RESISTANT CANTALOUPE

WHITE BUSH SQUASH

FORDHOOK SQUASH

— VEGETABLE SEED —

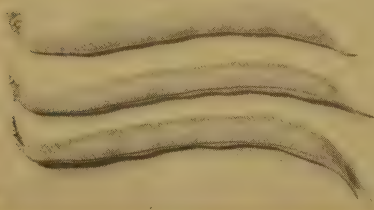

GREEN GLOBE ARTICHOKE

Artichoke, Green Globe

A tall (3 to 4 ft.) growing perennial which produces edible flower buds of delicate flavor. Heads are dark green, globular. 3 to 4 inches in diameter. Pkt. 15¢; oz. \$1.00; $\frac{1}{4}$ lb. \$3.00.

Asparagus, Mary Washington

This variety of asparagus was developed for resistance to rust. Shoots are thick and straight, dark green in color. Plant seed in spring, transplant roots to permanent location when one year old. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.25.

STRINGLESS GREEN POD BEAN

Bean, Stringless Green Pod Bush

Bushy plants are the most productive of all snap bean varieties. Pods are almost round, slightly curved, meaty, stringless and of excellent flavor. Especially popular with home gardeners. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, Topcrop Bush

A disease resistant variety which is fine for home gardens and market. Plants abundantly produce thick, stringless, meaty pods. Fine flavored, popular for freezing. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, Tendergreen Bush

An all-purpose, high quality, heavy producing variety suitable for shipping, canning and freezing. Pods are round, almost straight, meaty, stringless and well flavored. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, Pinto

Considered by many people to be the best variety of snap bean for home use. Good flavored and a very heavy producer. Can be planted earlier than other snap beans. Also good as shells or dry beans. Our stock grown especially for planting beans. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.25.

Bean, Pencil Pod Black Wax Bush

Bushy plants are very productive and bear over a long period. Pods are creamy yellow, meaty and well filled, fine flavored. Seed are black. The best wax bean for home use, market, and canning. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, Commodore Improved (Bush Ky. Wonder)

Vigorous plants produce over a long period. Long, round, stringless pods with a distinctive pole bean flavor. A very fine home garden variety. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, Kentucky Wonder Pole

The most widely used and best known variety of pole beans. Popular for its fine flavor and quality when young. Large, long-bearing vines are hardy, rust resistant. Pods almost round, slightly curved and slightly stringy. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, McCaslan Pole

A pole bean with vigorous plants which produce an abundance of large, meaty, slightly curved pods. Fine for snaps or for winter use as dried beans. Not as well known as some pole varieties, but always satisfying. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, Fordhook 242 Bush Lima

Less sensitive to soil and weather conditions than other kinds of limas. Plants are hardy and produce over a long period of time. Pods are short and broad, well filled. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, Jackson Wonder Bush Lima (Calico)

A hardy, productive, heat and drouth resistant variety of bush lima. Broad, flat pods contain buff-colored seed speckled with dark purplish-black beans. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, Henderson Bush Lima

The most widely used lima bean for home gardens and market because of its fine quality and productiveness. Pods are broad, seed pale green and meaty at cooking stage. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

Bean, Florida Speckled Pole Lima

White seed with purplish markings. Strong growing plants produce over a long period of time, withstanding hot dry weather better than other varieties of pole limas. Very fine flavored. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

GARDENGREEN BEAN

Bean, Gardengreen

Round, thick-meated, straight pods of bright green are stringless and of excellent quality and flavor. Medium sized plants are very productive and resistant to mosaic. A fine variety for home gardens and marketing. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.75.

PERFECTED DETROIT BEET

Beet, Detroit Perfected

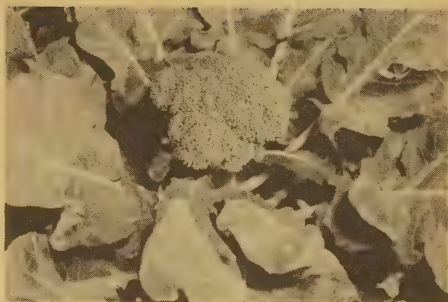

Tall green tops with round, smooth, dark red, medium sized bulbs. Best variety for home gardens and local market. Fine for canning whole, slicing or cutting. Holds color well. Pkt. 15¢; oz. 25¢; $\frac{1}{4}$ lb. 75¢.

Beet, Early Blood Turnip

A very early variety. Fine for home use and market. Bulbs medium sized, semi-globe shaped, rich red. A popular variety. Pkt. 15¢; oz. 25¢; $\frac{1}{4}$ lb. 75¢.

Beet, Early Wonder

An early beet which is well suited to home and market needs. Flattened, globe shaped bulbs with small tap root, medium tops. Good texture and flavor, dark red, smooth. Pkt. 15¢; oz. 25¢; $\frac{1}{4}$ lb. 75¢.

DI CICCIO BROCCOLI

Broccoli, De Cicco

An early variety of broccoli fine for home use, marketing and freezing. Plants medium tall, light green, very productive. Large heads and side shoots of very high quality. Pkt. 15¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.50.

CATSKILL BRUSSELS SPROUTS

Brussels Sprouts, Catskill

Dwarf plants tightly packed with firm, round, cabbage-like sprouts $1\frac{1}{4}$ inches in diameter. The most desirable variety for home use or freezing. Pkt. 15¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.50.

Cabbage, Chieftain Savoy

Very firm, medium large, well protected heads of fine flavor. The earliest and most popular savoyed variety. Heads stay firm for a long time. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.20.

EARLY JERSEY WAKEFIELD CABBAGE

Cabbage, Early Jersey Wakefield

A very early home and market variety. Heads 2 to 3 pounds, white inside, crisp and fine flavored. Compact growth permits close spacing in row. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.20.

Cabbage, Surehead

Large, firm heads of fine quality and long-keeping qualities. Almost certain to head, even under unfavorable conditions. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.20.

DANVERS RED CORE CARROT

Carrot, Danvers Red Core

Quickly grows to medium size. Roots tapered, bright orange with core of similar color. Mild flavored, fine quality. Highly recommended for home use and market. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.20.

Carrot, Gold Pak

Long, slender, smooth, rich-orange roots of good quality. A fine variety which excels many older varieties in quality and production. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.20.

IMPERATOR CARROT

Carrot, Imperator

Roots long, smooth, tapering to blunt tip. Flesh rich orange, fine grained and of good quality. Fine variety for home or market. Pkt. 15¢; oz. 40¢; $\frac{1}{4}$ lb. \$1.20.

GOLDEN SELF BLANCHING CELERY

Celery, Golden Self Blanching

Medium tall, compact stalks which easily blanch to a creamy-white stalk with golden foliage. A very desirable home-garden variety. Pkt. 15¢; oz. \$1.00; $\frac{1}{4}$ lb. \$3.00.

Collard, Southern (Georgia)

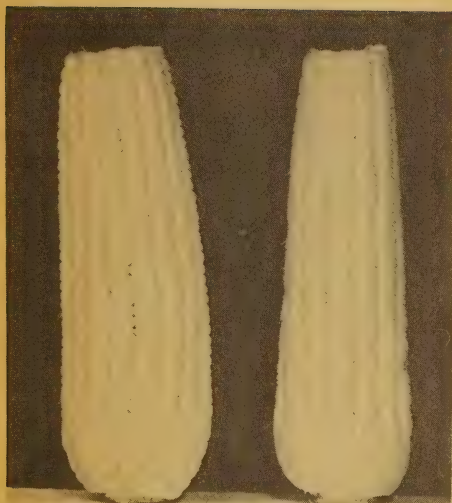

Large, upright, dark green leaves. Adapted to almost all types of soil. Fine flavored and tender. Pkt. 10¢; oz. 15¢; $\frac{1}{4}$ lb. 45¢; 1 lb. \$1.00.

Corn, Golden Cross Bantam Hybrid

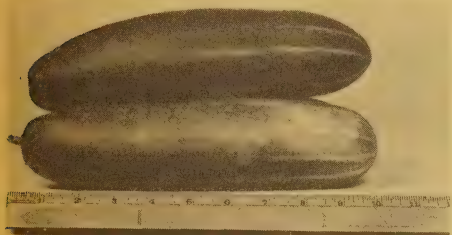

Stalks sturdy and very uniform. Medium sized, yellow ears, well filled (10 to 12 rows) and the best flavored of any sweet corn. Resistant to bacterial wilt. A favorite garden corn. Pkt. 15¢; $\frac{1}{2}$ lb. 40¢; 1 lb. 75¢; 2 lbs. \$1.35; 5 lbs. \$3.00.

Corn, Texas Honey June Sweet

A very hardy sweet corn of fine flavor and quality. White kernels, medium to large ears resistant to ear worms. Open pollinated. Pkt. 15¢; $\frac{1}{2}$ lb. 30¢; 1 lb. 50¢; 2 lbs. 90¢; 5 lbs. \$2.00.

TEXAS HONEY JUNE SWEET CORN

STRAIGHT 8 CUCUMBER

Cucumber, Straight-8

The best all-purpose variety for home use and market. Fruits long, smooth and uniform, dark green with crisp flesh. Quality good up to eight inches long. A very heavy producer. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. \$1.00.

EARLY SURECROP HYBRID CUCUMBER

Cucumber, Early Surecrop Hybrid

Dark green fruits are slender, 8 to 9 inches long. Flesh white, crisp and delicious. Vines vigorous, very prolific and resistant to disease. Early Surecrop is highly suitable for home use and market sales. Pkt. 25¢; $\frac{1}{2}$ oz. \$1.75; oz. \$3.00.

Cucumber, Early Cluster

A very early pickling cucumber. Blocky fruits are medium green with tender skin. Tends to produce fruits in clusters. Pkt. 15¢; oz. 35¢ $\frac{1}{4}$ lb. \$1.00.

EARLY CLUSTER CUCUMBER

MARKETER CUCUMBER

Cucumber, Marketer

Dark green, smooth, tapering fruits with crisp white flesh. Vines vigorous and prolific. Pkt. 15¢; oz. 35¢; $\frac{1}{4}$ lb. \$1.00.

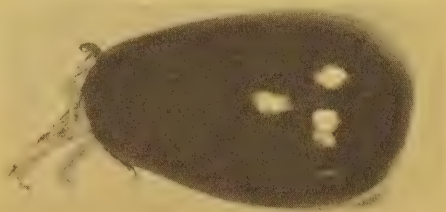

GREEN STRIPED CUSHAW

Cushaw, Green Striped

Fruits large, smooth, white with mottled green stripes, often growing 20 inches long and weighing 12 pounds. Make good pies. Vigorous plants are prolific. Pkt. 15¢; oz. 30¢; $\frac{1}{4}$ lb. 90¢.

Egg Plant, Black Beauty

Large fruits of deep purple which hold color well after picking. A few plants will supply the average family. Pkt. 15¢; oz. 75¢; $\frac{1}{4}$ lb. \$2.25.

MISSION BELL EGG PLANT

Egg Plant, Mission Bell

An excellent variety for home use and market. Medium tall, vigorous, heavy yielding plants. Fruit deep oval, dark, smooth with shiny skin. Quality exceptionally fine. Pkt. (50 seed) 25¢; 3 pkts. 60¢.

HERBS

Anise

An annual herb which grows to 18 inches tall. Seed used for flavoring. (Not the same as Florence or Sweet Fennel). Pkt. 15¢; oz. 50¢.

Sweet Basil

An annual herb growing to 12 inches tall. Leaves cut and dried for seasoning. Pkt. 15¢; oz. 50¢.

Caraway

Biennial herb. Young, first-year leaves used to flavor salads. Seed produced second year used for flavoring. Pkt. 15¢; oz. 50¢.

Coriander

Annual herb growing to 2½ feet tall. Seeds used for flavoring in baking. Pkt. 15¢; oz. 50¢.

Dill, Long Island Mammoth

Annual herb growing to 3 feet tall. Seed used for making dill pickles. Pkt. 15¢; oz. 50¢.

Sweet Marjoram

A tender, perennial herb growing to 2 feet tall. Cut leaves before blooming, dry for seasoning. Pkt. 15¢; oz. 50¢.

Broadleaf Sage

Hardy, perennial herb growing to 18 inches tall. The most widely used herb. Cut and dry leaves for seasoning. Pkt. 15¢; oz. 50¢.

Thyme

Hardy, perennial herb growing to 10 inches tall. Young stems and leaves used for seasoning, either fresh or dried. Pkt. 15¢; oz. 50¢.

ICEBERG LETTUCE

Lettuce, Iceberg

A crisp, large headed variety fine for home garden and market. Heads white inside, tender and crispy. Wavy, light green leaves. Pkt. 15¢; oz. 35¢; ¼ lb. \$1.00.

Lettuce, Salad Bowl

The best leaf lettuce for home gardens. Easily grown, and stays good over a long period. Tender, sweet and fine flavored. Pkt. 15¢; oz. 50¢; ¼ lb. \$1.50.

Mustard, Large Smooth Leaf

Makes large, smooth leaves that are fine flavored, good to eat. Pkt. 10¢; oz. 15¢; ¼ lb. 45¢; 1 lb. \$1.00.

Okra, Spineless Green Velvet

Produces long, slender pods that are smooth and stickerless. Very prolific. Pods should be kept picked. Pkt. 15¢; oz. 25¢; ¼ lb. 75¢.

Okra, Spineless White Velvet

Bears an enormous number of long pods which are tender, smooth and stickerless. Pods should be kept picked. Pkt. 15¢; oz. 25¢; ¼ lb. 75¢.

Onion, Crystal White Wax

Medium sized bulbs are clear white, mild, delicate flavor. An ideal Bermuda-type variety for home gardens. Pkt. 15¢; oz. 50¢; ¼ lb. \$1.50.

Onion, Yellow Sweet Spanish

Bulbs large, mild, sweet flavored. Light yellow skins, crisp, white flesh. An excellent onion for home gardens and shipping. Pkt. 15¢; oz. 50¢; ¼ lb. \$1.50.

Onion, White Granex Hybrid

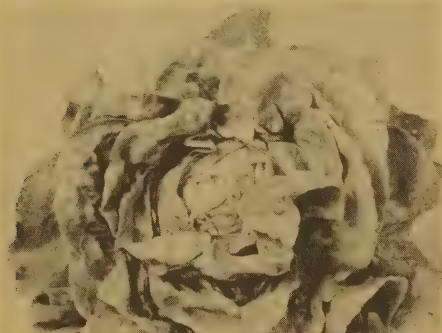

A vigorous growing, heavy yielding variety which is resistant to pink-root. Flesh is clear white, sweet and seldom splits. Fine variety for early market and home use. Pkt. (200 seed) 25¢; 3 pkts. 60¢.

Parsley, Champion Moss Curled

Plant is compact in growth, dark green leaves finely cut, giving a moss-like appearance. Used for flavoring and garnishing. Pkt. 15¢; oz. 25¢; ¼ lb. 75¢.

Peas, Bliss Everbearing

A very dependable home garden variety that is wilt resistant. Pods are long, dark green, slightly curved. Fresh peas are large and sweet, medium green. Plants wilt resistant. Dry seed wrinkled. Pkt. 15¢; ½ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.50.

BIG BOSTON LETTUCE

Lettuce, Select Big Boston

The most pleasing, all-purpose lettuce that we have grown. Large, fine flavored heads are smooth, firm and crisp. Will head under almost any growing conditions. Pkt. 15¢; oz. 35¢; ¼ lb. \$1.00.

Lettuce, Great Lakes

Medium large heads are firm and crisp, dark green leaves on outside. Quality excellent. Withstands heat and dry fairly well. Pkt. 15¢; oz. 35¢; ¼ lb. \$1.00.

Peas, Thomas Laxton

A fine all-purpose variety. Well foliaged vines produce dark green, straight pods. Fresh peas are large, tender, bright green, oval shaped. Plants wilt resistant. Dry seed wrinkled. A highly recommended variety. Pkt. 15¢; ½ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.50.

Peas, Nott's Excelsior (American Wonder)

A dwarf vining, early home garden variety. Green peas are fine flavored, tender, medium sized. Dry seed wrinkled. Pkt. 15¢; ½ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.50.

Peas, Pedigree Extra Early (First and Best)

An early, home garden variety which is very prolific. Pods are filled with tender, well-flavored peas. Plants wilt resistant. Pkt. 15¢; ½ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.50.

EDIBLE COWPEAS

(Seed should be inoculated)

Peas, Black Eye

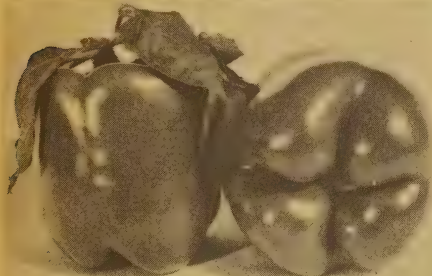

Pods long, large and easily snapped or shelled. Vines very prolific. Our stock grown especially for planting seed, and are preferred by many gardeners. Pkt. 15¢; ½ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.50.

Peas, White Cream

Slender pods produced on medium large plants. Very sweet and the tastiest of all edible cowpeas. Pkt. 15¢; ½ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.50.

Peas, Purple Hull

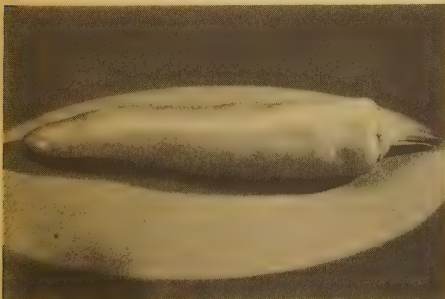

An old favorite with many gardeners. Long, well-filled pods are purple when mature. Vigorous, prolific vines. Pkt. 15¢; ½ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.50.

CALIFORNIA WONDER SWEET PEPPER

Pepper, California Wonder Sweet

Best and the most prolific of the large "bull-nosed" sweet peppers. Flesh is thick, mild and sweet. Large pods ideal for stuffing. Plants vigorous, upright, very productive. Pkt. 15¢; oz. 80¢; ¼ lb. \$2.50.

SWEET BANANA PEPPER

Pepper, Sweet Banana

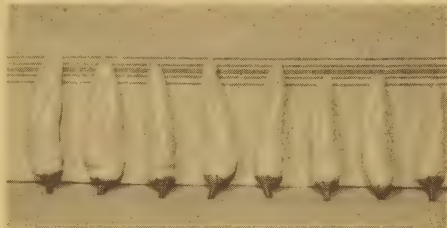

Long, slender, thick-walled pods of waxy, banana-yellow color turning red at maturity. Flesh crisp, sweet and mild. Vigorous plants very prolific. A choice sweet pepper. Pkt. 15¢; oz. 80¢; ¼ lb. \$2.50.

Pepper, Pimiento Sweet

Plants very prolific, fruits heart-shaped, smooth, thick-walled, mild and sweet. Dark green pods turning bright red at maturity. A very popular sweet pepper for home use. Pkt. 15¢; oz. 80¢; ¼ lb. \$2.50.

Pepper, Anaheim Chili Hot

Large, smooth, tapering green pods 6 to 8 inches long, about 1½ inches broad at shoulder. Fruits bright green, turning red at maturity. Distinctive flavor. Plants sturdy and prolific. Pkt. 15¢; oz. 80¢; ¼ lb. \$2.50.

HUNGARIAN YELLOW WAX HOT PEPPER

Pepper, Hungarian Yellow Wax Hot

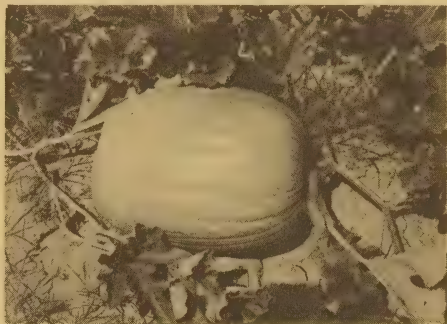

Very early and prolific. Thick-walled pods 5 to 6 inches long, 1½ inches broad at shoulder, creamy yellow, turning bright red at maturity. Extremely hot flavored. Pkt. 15¢; oz. 80¢; ¼ lb. \$2.50.

Sweet Pepper, Yolo Wonder

Vigorous, large-leaved, upright plants are resistant to mosaic and very productive. Thick-fleshed fruits are smooth, blocky, mild and sweet flavored. Pods green turning red at maturity. Pkt. 15¢; oz. 80¢; ¼ lb. \$2.50.

Popcorn, White Rice

An old favorite with many gardeners. Stalks normally grow to about 6 feet, ears about 6 inches long with white kernels. Pops white and tender. Pkt. 15¢; ½ lb. 40¢; 1 lb. 70¢; 2 lbs. \$1.25; 5 lbs. \$2.50.

CONNECTICUT FIELD PUMPKIN

Pumpkin, Connecticut Field (Big Tom)

Suitable for pies, canning and stock feeding. Fruits round, weigh up to 20 pounds. Dark orange skin with thick, sweet, coarse flesh. A fine variety for growing "the big ones." Pkt. 15¢; oz. 30¢; ¼ lb. 90¢.

SMALL SUGAR PUMPKIN

Pumkin, Small Sugar

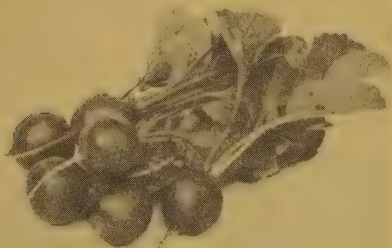

Heavy producer of dark orange, small pumpkins which are excellent for baking and pie making. Flesh thick, fine textured and sweet. Very early. Pkt. 15¢; oz. 30¢; $\frac{1}{4}$ lb. 90¢.

RADISH SEED FOR MARKING THE ROW

Radish seed are quick germinating and will be up within a few days after planting. When planting slow germinating seed (lettuce, carrot, beet, etc.), mix in a few radish seed to mark the row for early cultivation and to help break soil crusts. The radishes will be matured and pulled long before interfering with the slower growing plants.

Radish, Cherry Belle

An extra early, round, bright scarlet-red radish with short tops. Uniform in size and nicely colored. A favorite home garden and market variety. Pkt. 10¢; oz. 20¢; $\frac{1}{4}$ lb. 60¢.

SAXA RADISH

Radish, Saxa

An extremely early variety. Bulbs bright red, flesh crispy and snappy. Plant a short row every few days and have good radishes all season. Pkt. 10¢; oz. 20¢; $\frac{1}{4}$ lb. 60¢.

Radish, Sparkler

Round, red bulbs are white on lower portion. Flesh white, crisp and juicy. Very attractive round radish. Pkt. 10¢; oz. 20¢; $\frac{1}{4}$ lb. 60¢.

Radish, White Icicle

A fine garden variety. Bulbs are long, slender, pure white. Flesh crisp and well flavored. Pkt. 10¢; oz. 20¢; $\frac{1}{4}$ lb. 60¢.

Spinach, America

Dark green, crumpled leaves are thick and tender. Especially popular for its heavy production and slowness to go to seed. Pkt. 10¢; oz. 15¢; $\frac{1}{4}$ lb. 45¢.

Spinach, Bloomsdale Dark Green

A choice variety for fall or spring planting. Glossy, dark green, crumpled leaves are easily prepared for cooking. Grows flat on ground. Pkt. 10¢; oz. 15¢; $\frac{1}{4}$ lb. 45¢.

Spinach, Hybrid No. 7

A fine variety for fresh use, canning and freezing. Plants show hybrid vigor in growth. Leaves semi-savoyed, glossy, dark green. Pkt. 15¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.50.

VELVET SPINACH

Spinach, Velvet

A different type of spinach which grows upright instead of flat. Leaves are thick, smooth and fleshy. The "spinach" flavor is milder than most other varieties. Can be planted from October through March, as it lives through hard freezes. As tender leaves are removed, they are quickly replaced by new growth. Pkt. 10¢.

Summer Squash

EARLY PROLIFIC STRAIGHTNECK

Squash, Early Prolific Straight Neck (Yellow)

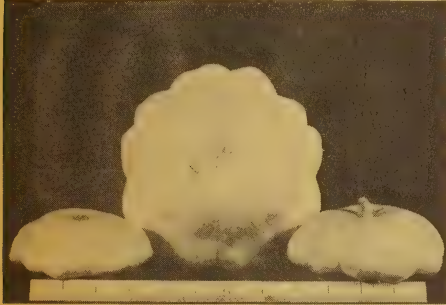

The best variety for home gardeners, market growers and shippers. Plants are bushy and spreading and very prolific, vigorous growth. Fruits are of excellent quality; smooth, straight, creamy yellow. Flesh is pale yellow, fine flavored, crisp and tender. No waste in preparing for cooking. Pkt. 15¢; oz. 30¢; $\frac{1}{4}$ lb. 90¢.

STORR'S GREEN HYBRID SQUASH

Squash, Storrs Green Hybrid

A very attractive, dark green summer squash. White, crisp, fine textured flesh of excellent flavor. Fruits cylindrical and smooth. Vigorous growing vines are very productive. Pkt. 25¢; oz. 50¢; $\frac{1}{4}$ lb. \$1.75.

WHITE BUSH SQUASH

Squash, White Bush

Most popular white squash with some gardeners. Fruits scalloped, pure white, thick and smooth. Flesh is white, fine grained and of excellent flavor. Pkt. 15¢; oz. 30¢; $\frac{1}{4}$ lb. 90¢.

Fall and Winter Squash

BLUE HUBBARD SQUASH

Squash, Blue Hubbard

The best known variety of winter squash. Fruits are pointed at both ends, with hard,

blue-gray rind. Fine flavored orange-yellow flesh is thick and fine textured. Excellent for baking or pie making. Pkt. 15¢; oz. 30¢; $\frac{1}{4}$ lb. 90¢.

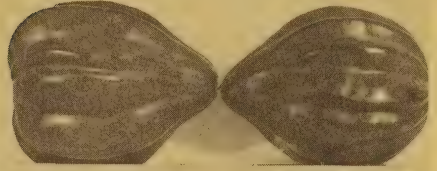

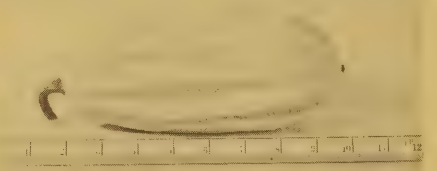

TABLE QUEEN ACORN SQUASH

Squash, Acorn (Table Queen)

Vigorous growing, prolific vines produce early, dark green, acorn shaped fruits. Smooth skin is ridged. Flesh light yellow with few fibers. Bakes dry and sweet and stores well. Pkt. 15¢; oz. 30¢; $\frac{1}{4}$ lb. 90¢.

FORDHOOK SQUASH

Squash, Fordhook

Fruits oblong, smooth with light yellow skin and flesh. Rich, delicious, buttery flavor. Vining plants are very productive. A popular winter-type squash. Pkt. 15¢; oz. 30¢; $\frac{1}{4}$ lb. 90¢.

Swiss Chard, Lucullus

Grows upright. Large, light green leaves with thick white stems. Mild flavored. Popular home garden and market variety. Pkt. 15¢; oz. 25¢; $\frac{1}{4}$ lb. 75¢.

Tendergreen Mustard

This mustard-spinach is a fine all-season greens for home use. Resistant to heat and drouth, and withstands cold weather. Large, dark green leaves are thick and smooth. Pkt. 10¢; oz. 15¢; $\frac{1}{4}$ lb. 45¢; 1 lb. \$1.00.

Rutabaga, American Yellow Purple Top

Good quality, uniform size, firm light yellow flesh with purple top part of bulb. Pkt. 10¢; oz. 15¢; $\frac{1}{4}$ lb. 45¢; 1 lb. \$1.00.

Turnip, Purple Top White Globe

Standard variety for all-purpose growing. Quality is excellent. Bulbs are round, smooth with white, fine-grained, crisp flesh. White with purple upper portion of bulb. An all-time favorite variety of turnip. Pkt. 10¢; oz. 15¢; $\frac{1}{4}$ lb. 45¢; 1 lb. \$1.00.

Turnip, Shogoin

Produces high quality tops for greens as well as very good turnips. Bulbs white with crisp, fine grained flesh of good flavor. Quick growing. Pkt. 10¢; oz. 15¢; $\frac{1}{4}$ lb. 45¢; 1 lb. \$1.00.

— FLOWER SEED —

ROYAL CARPET ALYSSUM

Alyssum, Royal Carpet

Alyssum is very easy to grow and is insect and disease free. Plants grow only a few inches high, ideal for border or low cover. Covered with small, bright purple flowers. Pkt. 15¢.

MOLTEN FIRE AMARANTHUS

Amaranthus, Molten Fire

Tall growing, attractive foliage plant, three to five feet tall. Bronze foliage with poinsettia-like head. Pkt. 15¢. Mixed Colors Amaranthus, Pkt. 15¢.

Aster, Improved Crego (Mixed Colors)

Large flowers with slender petals. Branching plants are sturdy, bearing long-stemmed flowers. Mid-season blooming, plants wilt resistant. Pkt. 15¢.

POWDER PUFF ASTER

Aster, Powder Puff (Mixed Colors)

Plants grow upright, with all flowers stemming from main stalk. Produce many beautiful, double flowers. Wilt resistant. Pkt. 15¢.

Bachelor Button (Mixed Colors)

Double flowers born on long stems are very nice as cut flowers. Hardy. Also known as Cornflower. Pkt. 15¢.

Bells of Ireland

Plants 2 to 3 feet tall, covered with attractive, bell-shaped, light green flowers. Withstand heat extremely well. Excellent for cut and dried flower arrangements. Pkt. 15¢.

Blue Bonnet (Texas State Flower)

A re-seeding annual which thrives even in the poorest soils. Needs well-drained location. Pkt. 15¢; oz. 50¢.

Cactus (Finest Mixed)

A complete selection, including many rare types. Easy to grow after seed are started. Pkt. 25¢.

HYACINTH FLOWERED ICEBERG CANDYTUFT

Candytuft, Hyacinth Flowered Iceberg

An annual growing to 1 foot in height with white flowers in spikes similar to hyacinths. Widely adapted, rapid blooming. Pkt. 15¢.

CANTERBURY BELLS

Canterbury Bells (Mixed Colors)

Cup-and-Saucer type. Tall growing, slender plants with spikes of erect, bell-shaped flowers in mixed colors. A biennial which will bloom first year if started very early. Excellent selection of colors. Pkt. 15¢.

Carnation, Chabaud Giant (Mixed Colors)

Upright plants grow 18 inches tall, producing large, showy, double flowers on long cutting stems. This perennial will bloom 5 months from planting. Needs winter protection. Pkt. 15¢.

Castor Bean

Large-leaved plants of tropical appearance. Very suitable for background plantings. Mixed types (tall and short) or Zanzibar (tall growing). Pkt. (either type) 15¢.

TOREADOR CELOSIA

Celosia, Toreador

Medium-tall, crested cockscomb. Bright red combs often 12 inches across, light green foliage. A very colorful flowerbed plant. Pkt. 15¢.

PAMPUS PLUME COCKSCOMB

Cockscomb, Pampus Plume (Mixed Colors)

Large fleecy, feathery flowers in mixed colors. Plants are quick growing, heat loving and pest free. Easy to grow. Pkt. 15¢.

LARGE MIXED COLEUS

Coleus, Large Mixed

Suitable for beds, borders, or as pot plants. Brightly colored leaves make this a most attractive plant. Tender, must be given winter protection. Pkt. 25¢.

Columbine, Dobbie's Imperial (Mixed Colors) (Aquilegia)

A hardy perennial producing large, broad-petaled, spurred flowers in spring and early summer. Foliage very attractive, often turning to rich colors in Autumn. Pkt. 15¢.

DOBBIE'S IMPERIAL COLUMBINE

Cosmos, Fiesta

A true scarlet-colored cosmos. Early blooming, hardy and easy to grow. Pkt. 15¢.

Cosmos, Sensation (Mixed Colors)

Large, single flowers with slightly overlapping petals. Tall growing plants producing long-stemmed flowers. Pkt. 15¢.

UNWIN'S DWARF HYBRID DAHLIA

Dahlia, Unwin's Dwarf Hybrids (Mixed Colors)

Low growing, sturdy plants with half-double flowers in an excellent blend of colors. Free flowering, very attractive. Pkt. 15¢.

Dahlia, Giant Exhibition Hybrids (Mixed Colors)

Tall growing plants producing immense double flowers in a very fine selection of colors. Start early, transplant after frost. Tubers may be saved from choice plants. Pkt. 25¢.

SHASTA DAISY

Shasta Daisy

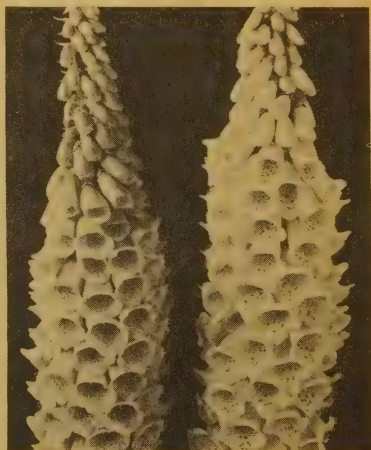

An easy-to-grow, well-known perennial bearing large white flowers with yellow centers on 2 foot plants. Pkt. 15¢.

Delphinium, Pacific Giants (Mixed Colors)

Very large, long-stemmed spikes of florets in a nice color assortment. Almost all flowers double. Often called perennial larkspur. Pkt. 15¢.

Geranium (Choice Mixed)

A tender perennial ideally suited to potting and bedding. Easily grown from seed. May be potted for winter protection indoors. Transplant to outside bed again after weather warms in spring. Pkt. 25¢.

FOXGLOVE DIGITALIS

Digitalis (Foxglove)

Plants erect with thimble-like flowers in tall clusters, all drooping toward one side of plant. Long lasting blooms with blotched throats, resembling gloxinias. Best grown as biennials in partial shade. Pkt. 15¢.

Digitalis

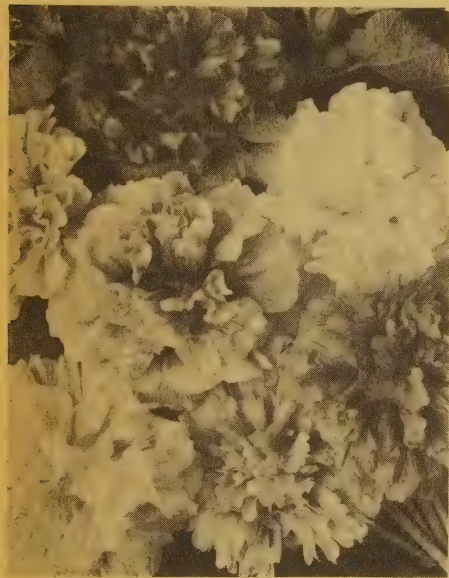

Very similar to above except with spotted throats. Pkt. 15¢.

Gourds, Dipper

Ripened fruits, after drying, are used for decorations and for drinking dippers. Very fast growing vines do best when planted near a fence or trellis. Pkt. 15¢.

Gourds, Ornamental

Dried fruits are nicely used for ornamental decorations. This selection includes small and large types. Pkt. 15¢.

DOUBLE TRIUMPH HOLLYHOCK

Hollyhock, Double Triumph (Mixed Colors)

Perennial which will bloom the first season, if started early. Tall growing, heavy foliaged plants with beautiful flowers the length of stalks. Many pastel colors and shades. Plant in a permanent location. Pkt. 15¢.

Lantana

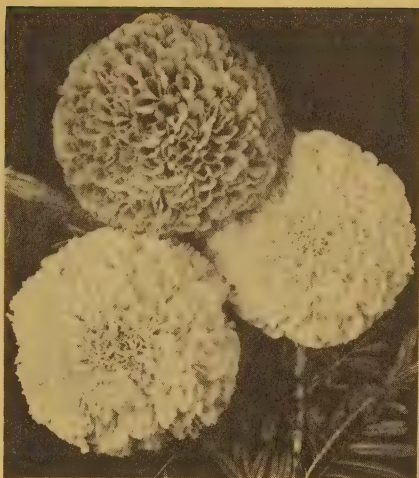

Heads of tiny, verbena-like flowers in mixed colors. Bloom profusely from midseason until frost. Bright green foliage which dies down after frost, comes again in spring. A very hardy and attractive shrub-like plant which should be planted in permanent location. Pkt. 25¢.

Larkspur, Giant Imperial

Long, thickly flowered spikes grow upright. This strain does not branch as much as older types, more compact growth. An easy-to-grow, early blooming annual. Choice of colors: Blue Bell, Dazzler (Scarlet), Rose King, White King, or Mixed Colors. Pkt. (any of above colors) 15¢.

Marigold, Sunset Giants (Mixed Colors)

Tall growing, hardy plants which bloom all season. Colors vary from dark orange through light yellow, large double heads. We admire this flower for its hardiness. Pkt. 15¢.

SUNSET GIANT MARIGOLD

Marigold, Crackerjack

Blooms several weeks earlier than other African Marigolds. Large, double flowers in primrose, yellow, orange and gold. Plants compact, bushy and vigorous. Pkt. 25¢.

CRACKERJACK MARIGOLD

Morning Glory, Gt. Flowering (Mixed Colors)

Large flowered climbers are hardy and easy to grow on fences, trellis, etc. Pkt. 15¢.

SWISS GIANT PANSY

Pansy, Swiss Giants (Mixed Colors)

Beautiful, ruffled flowers of assorted colors. Keep blossoms picked and they will bloom for a long period. Pansy blooms earlier than almost any other annual. This strain very fine for home flowerbeds. Pkt. 15¢.

PERIWINKLE

Periwinkle

Very hardy and very easy to grow. Sturdy plants with glossy-green foliage bloom all summer and fall. Choice of colors: Alba (White), Rose, White with crimson eye, or Mixed Colors. Pkt. (any of above colors) 15¢.

CARNIVAL PETUNIA

Petunia, Carnival (Mixed Colors)

A dwarf, bedding-type petunia in a wide range of colors. Large, showy flowers often 3 inches across, with many fringed and ruffled petal edges and bi-colored flowers. Plants vigorous and long blooming. Pkt. 25¢; 5 pkts. \$1.10.

Petunia, Comanche Hybrid (Red)

Very rich, bright, uniform scarlet red. The hybrid vigor of this petunia makes it an outstanding flower. Hardy and very attractive, blooming over a long period. Pkt. 25¢; 5 pkts. \$1.10.

Petunia, Confetti (Mixed Colors)

Plants 12 to 16 inches tall with extra vigor

and blooming for bedding-type petunias. A fine selection of very gay colors. Pkt. 25¢; 5 pkts. \$1.10.

Petunia, Firechief (Red)

Plants are dwarf, compact, and bloom profusely over a long period. Plants covered with brilliant scarlet red blossoms. Pkt. 15¢.

GIANTS OF CALIFORNIA RUFFLED PETUNIA

Petunia Gts. of California Ruffled (Mixed Colors)

A well balanced mixture of light and dark colors, heavily ruffled and veined. Vigorous plant growth with large, showy blooms. Pkt. 25¢; 5 pkts. \$1.10.

Petunia, Hybrid (Mixed Colors)

One of the most popular annuals. Very hardy, continuous blooming. Strong growing and free flowering. This is the strain of petunia which everyone who gardens has planted . . . an old standby. Pkt. 15¢.

Petunia, Red Satin Hybrid

The most intense, scarlet-red of any petunia, with color holding throughout the season. Plants compact and neat in any weather and at any age. Pkt. 25¢; 5 pkts. \$1.10.

SCARLET LUSTRE HYBRID PETUNIA

Petunia, Scarlet Lustre Hybrid

Brilliant, scarlet-red color with yellow in throat of each flower. Huge blossoms with waved and ruffled petal edges. Plants vigorous, one foot tall with 2 foot spread, blooming over a long period. Pkt. 25¢; 5 pkts. \$1.10.

Phlox Drummondii (Mixed Colors)

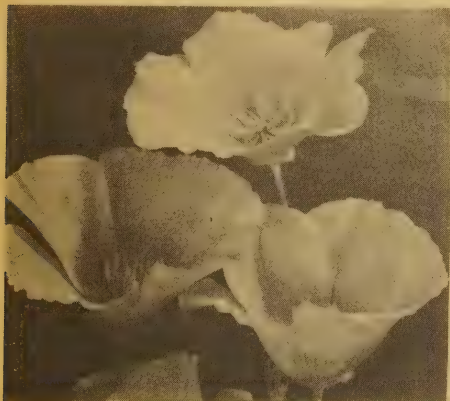

An annual growing about 1 foot tall, covered with masses of bright blooms in clusters. Easy to grow. Pkt. 15¢.

GIGANTEA ART SHADES PHLOX

Phlox, Gigantea Art Shades

Plants 8 to 12 inches tall bearing masses of large, lovely flowers of pastel shades with light eye. A favorite in many flowerbeds. Pkt. 15¢.

CALIFORNIA POPPY

Poppy, California (Orange King)

A low growing annual. Lacy, bluish-green foliage covered with slender, bright orange blossoms. Very popular border or edging plant. Hardy and easily grown from seed. Pkt. 15¢.

Poppy, California (Brilliant Mixed)

Same as Orange King except a selection of choice colors. Pkt. 15¢.

Poppy, Double Shirley (Mixed Colors)

Three-foot annual which branches and blooms freely. Hardy, blooms very early. Large, double flowers of excellent colors. Pkt. 15¢.

Poppy, Double Pink

Freely branching plants grow to 3 feet. Large, showy, double flowers of deep rose-pink. Hardy, early blooming. Pkt. 15¢.

DOUBLE WHITE POPPY

Poppy, Double White

Large, feathery, round blossoms which are often 4 inches across. An annual growing to 3 feet tall. Very outstanding in any flower garden. Pkt. 15¢.

Pinks, Single Gaiety Fringed (Mixed Colors)

Large, lacy flowers 2 inches across with deeply cut petal edges. Blooms, in a wide range of colors, carry pheasant-eye markings. Plants 10 to 12 inches tall, free flowering. Pkt. 15¢.

Portulaca (Moss Rose)

Forms a thick carpet 3 to 4 inches thick, covered with small, semi-double flowers of all colors. Continues to bloom until frost. Ideal for low borders and ground cover. Needs full sunshine. Pkt. 15¢.

AMERICA SALVIA

Salvia, America

Glowing scarlet spikes in summer and fall. Bushy plants 18 inches tall. Very attractive. Pkt. 25¢.

Scarlet Runner Bean

Large, bright scarlet flowers on vigorous growing vines. Very attractive as flowering plant; can also be used as shelled beans. Pkt. 15¢.

Snapdragon, Colossal (Mixed Colors)

Beautiful spikes of brightly colored flowers born on 3 foot stems. Very hardy and blooms over a long period. Full color selection. Pkt. 15¢.

Snapdragon, Mardi Gras (Mixed Colors)

A tall, early, extremely vigorous variety bearing long spikes of flowers in a very complete selection of colors and color combinations. F₂ Hybrid. Pkt. 15¢.

TETRAPLOID SNAPDRAGON

Snapdragon, Tetraploid (Mixed Colors)

A fine strain of tremendous vigor that produces strong 3 foot stems filled with very large flowers in a wide color selection of many colors and bicolors, some veined. Pkt. 15¢.

GIANT IMPERIAL STOCK

Stock, Giant Imperial

An especially fine class of branching stocks. Very early blooming, with a high percentage of double flowers. Large flowers and long stems make this strain especially desirable for cutting. An old favorite in every yard. Choice of following colors: Blood Red, Canary Yellow, Light Blue, Elk's Pride (Purple), Rose, Snow White, or Mixed Colors. Pkt. (any of above colors) 15¢.

DWARF 10-WEEK STOCK

Stock, Dwarf 10-week (Mixed Colors)

Dwarf, compact, bushy plants blooming about 10 weeks after planting seed. Fine color selection. Pkt. 15¢.

CUTHBERTSON SWEET PEAS

Sweet Peas, Cuthbertson (Mixed Colors)

Early blooming, vigorous growing plants which produce an abundance of long-stemmed flowers. Resistant to heat. If flowers are kept picked, blooming will continue over a long period. Pkt. 15¢; oz. 25¢.

Sweet Peas, Perennial (Mixed Colors)

Fine for ground or as a climber. A hardy, heat resistant perennial lacking only fragrance. Pink, rose and white. Pkt. 15¢; oz. \$1.00.

Sweet William, Double (Mixed Colors)

A biennial which will bloom the first season if seeds are started early. Tall growing plants produce large clusters of beautiful, faintly scented flowers of choice colors. Pkt. 15¢.

Tree Morning Glory

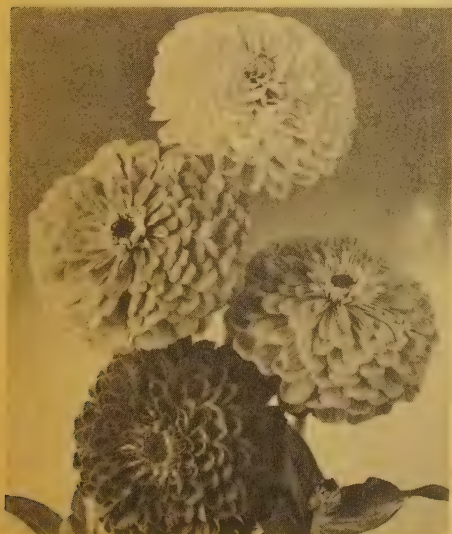

Under good conditions, this flower will make a bush, or tree, 8 feet tall with a spread of 6 feet or more. Every plant covered with light lavender blossoms every morning from June until frost. Pkt. 15¢.

MAMMOTH VERBENA

Verbena, Mammoth

Vigorous growing, spreading plants with large clusters of flowers. An all-time favorite. Choice of following colors: Blue, Defiance (Scarlet), Lavender, Pink and Rose, White, or Mixed Colors. Pkt. (any of above colors) 15¢.

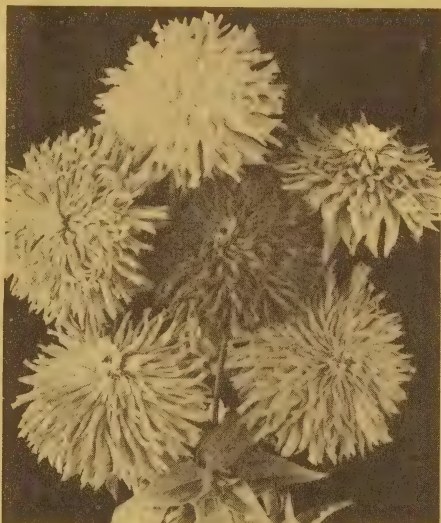

CALIFORNIA GIANT ZINNIA

Zinnia, California Giant

Many long-stemmed, large, showy flowers in a wide variety of colors. Plants are very hardy and continue blooming. Ideal for cut flowers and very easy to grow. Pkt. (Mixed Colors) 15¢; 1/2 oz. 60¢; 1 oz. \$1.00. Pkt. (Pastels) 15¢; 1/2 oz. 60¢; 1 oz. \$1.00.

Zinnia, Blaze (Red)

Large flowers are mandarin red, borne on tall, sturdy plants. Easy to grow and very adaptable. Long blooming and hardy. Pkt. 25¢; 1/2 oz. \$1.50; 1 oz. \$2.50.

CACTUS FLOWERED ZINNIA

Zinnia, Giant Cactus Flowered

Unusually large flowers with curled and frilled petals, giving them an attractive appearance. Complete color assortment, plants tall and vigorous. Choice of following colors: White, Salmon, Yellow, or Mixed Colors. Pkt. (any of above colors) 15¢; 1/2 oz. 60¢; 1 oz. \$1.00.

Zinnia, Ortho Polka

Flat, broad flowers with wide, well separated petals in an extremely varied selection of colors and markings. Pkt. 25¢; 1/2 oz. \$1.50; 1 oz. \$2.50.

Zinnia, Pride of Dieltrin

A new, bicolor combination of orange and flame. Giant Cactus Flowered type of scarlet flame surrounded by outer petals of bright golden orange. Plants vigorous and long blooming. Pkt. 25¢; 1/2 oz. \$1.50; 1 oz. \$2.50.

Zinnia, Lilliput (Pompon or Baby Zinnia)

Plants small, bushy and branching, growing to 18 inches tall. Flowers small, compact and an excellent selection of mixed colors. Pkt. 15¢; 1/2 oz. 60¢; 1 oz. \$1.00.

Bermuda Grass (Extra Fancy Hulled)

Bermuda is the most widely used grass for lawns in the southwest. Very easy to start from seed. Five pounds will sow 1000 square feet of lawn. Our hulled seed will germinate much quicker than unhulled seed. Sow seed after ground has warmed in spring; rake into soil and keep watered for 2 weeks. 1 lb. 80¢; 2 lbs. \$1.50; 5 lbs. \$3.50, postpaid.

PLANT FOODS, INSECTICIDES AND GARDEN SUPPLIES

Hyponex Plant Food

A complete plant food (fertilizer). So balanced that it will grow plants in the poorest of soils, in sand, or in a solution of Hyponex and water alone. Contains all the known major and minor elements necessary for plant growth, plus vitamin B1. Complete instructions on every container. Simple and easy to use. 2 oz. can 29¢; 5 oz. can 59¢; 10 oz. can \$1.00; 2 lb. can \$2.45.

59¢; 10 oz. can \$1.00; 2 lb. can \$2.45.

G & O Tomato Food

An organic plant food or fertilizer especially prepared for tomatoes. Powdered form is easy to use and contains no filler. A small handfull worked into the soil around each plant and watered in gives outstanding results. 2 lb. bag 69¢; 5 lb. bag \$1.19.

G & O Rose Food

Contains the necessary amount of organic materials for roses, no filler. Assures better growth, better and larger blooms. A necessity for all rose growers. 1 lb. bag 59¢; 5 lb. bag \$1.19.

Hyponex African Violet Food

A completely and instantly soluble plant food for African Violets, Ivy, Begonias, Geraniums, and Philodendron. Improves growth, beauty and increases blooming. 1 oz. 10¢; 7 oz. 50¢; 1 lb. \$1.00.

20% Superphosphate

A commercial fertilizer high in phosphate content. Use as a sidedressing when tomato plants begin to bloom to help prevent blossom shedding. 5 lb. bag \$1.25.

Plantabbs Plant Food

Clean, white, odorless, easy-to-use plant food tablets for indoor or outdoor use. Makes plants grow bigger, healthier, lovelier. Used by millions of gardeners for over 30 years. Complete directions. 20 tablets 19¢; 50 tablets 39¢; 200 tablets \$1.00.

Bone Meal Fertilizer

An excellent, long-lasting, organic, all-purpose fertilizer. Especially fine for roses, perennials and bulbs. Work into soil around established plants, or into flowerbeds before planting bulbs. 5 lb. bag \$1.25.

Du Pont Soluble Plant Food

This plant food is for spray or solution application to plants, either on leaves or in the soil around roots. Supplies crop nutrients for a quick pick-up. Will not cause leaf-burn. Use one teaspoon per gallon of water. 6 oz. can 69¢; 1½ lb. can \$1.95.

Sequestrene

For correction of iron chlorosis (yellowing) in azaleas, roses, rhododendrons, other ornamentals, turfs, and fruit trees. May be applied as a soil treatment either in dry form followed by watering, as a soil drench, or in foliage sprays, and may be used in combination with commonly used insecticides, fertilizers and fungicides. 4 oz. pkt. 98¢; 1 lb. can \$2.75; 5 lb. bag \$9.00.

Du Pont FTE

A special compound which puts essential trace elements back into the soil and makes these elements available as plants need them. Stays in the soil—will not leach out with moisture. 1 lb. can \$1.00.

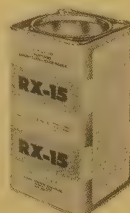

Rootone

Stimulates the natural tendency for roots to form on slips or cuttings. Rooting takes place much quicker, heavier root systems are formed and fewer flower cuttings die from disease. Added fungicide controls damping-off and other soil-borne diseases. ¼ oz. pkt. 25¢; 2 oz. jar \$1.

RX-15 Plant Food

Fast acting, odorless, concentrated plant food for all growing plants. Will not harm the most delicate plants or flowers. Guaranteed to show spectacular results in seven days, when used as directed. 1½ lb. can \$1.19.

Transplantone

Reduces wilt and loss when transplanting, helps grow new roots and reduces loss of water so plants start growing again in a much shorter time. ½ oz. pkt. 25¢; 3 oz. can \$1.00.

Solonex Soil Conditioner

An approved chemical soil conditioner that gives new life to potting and garden soils. Excellent for all house plants, flowers and vegetable soils. $\frac{3}{4}$ oz. pkt. 10¢; 2 oz. pkt. 25¢.

Panonex Planter Mix

Complete potting mixture for pots, planters, dish gardens or wall hangers. Ready to use as a perfect growing medium. 2 qt. bag 59¢.

Pelonex Plant Propagator

An ideal plant propagating medium for starting seeds or rooting cuttings. Light in weight, holds moisture and gives fine rooting conditions. 2 qt. bag 59¢.

Veronex Vermiculite

Absorbs 4 times its weight in water. Excellent for starting seeds or cuttings. Fine for mixing with potting soils. 2 qt. bag 59¢.

Caronex Charcoal

Specially prepared charcoal for conditioning soil, sand or water. Keeps water sweet when starting cuttings. 1 oz. pkt. 10¢; 3 oz. pkt. 25¢; 7 oz. 50¢.

Mosonex Peat Moss

A fine textured peat moss that serves as humus for all house plants. Fine for mixing with soil. 2 qt. bag 59¢.

Baccto Michigan Peat

A pure peat which is bacterially active. Mixed with soil, Michigan Peat gives you the ideal potting soil for all house plants. $\frac{1}{2}$ quart bag 29¢; $\frac{1}{2}$ peck bag 59¢.

Arasan Seed Disinfectant

A Thiram Seed Disinfectant for lawn seeds, vegetable seeds and flower bulbs. Applied as a dust directly to seed before planting. Gives much better stands than untreated seeds. 1 oz. pkt. 60¢.

Nitragin Garden Seed Inoculant

For snap beans, lima beans, Sweet Peas, English Peas and Lupines. This package treats up to 8 pounds of seed. Easy to use and greatly increases growth and yields of above legumes. Pkt. 25¢.

DU PONT INSECTICIDES, FUNGICIDES

Vegetable Garden Dust (or Spray)

A combination insecticide-fungicide, effective on many garden insects and diseases. Safe on tender plants such as cucumbers. Contains methoxychlor, zineb and rotenone. A general purpose, easy to use insecticide-fungicide, used as either a spray or dust. 8 oz. Squeeze-Duster \$1.19; 3 lb. bag \$2.75.

Floral Dust (or Spray)

Contains methoxychlor, ferimate, sulphur and rotenone. Safe for use on tender plants throughout the season for control of most insects and diseases. Use as spray or dust. 8 oz. Squeeze-Duster \$1.19; 3 lb. bag \$2.75.

Tomato Dust (or Spray)

In powder form for use as either spray or dust. Combination insecticide-fungicide for tomato plant protection throughout the growing season. 8 oz. Squeeze-Duster \$1.10; 2 lb. bag \$1.49.

Rose Dust (or Spray)

One complete formula — all that's needed to grow beautiful roses. Contains miticide in addition to insecticide and fungicide. Use as spray or dust. Contains methoxychlor, lindane, ferimate, sulphur and a miticide. 8 oz. Squeeze-Duster \$1.49; 3 lb. bag \$3.75.

Fruit Tree Spray

Combined insecticide-fungicide for use on home orchards. Contains methoxychlor, ferimate, and sulphur for complete insect and disease control. 1 lb. can \$1.25; 3 lb. bag \$2.75.

Du Pont Garden Insecticide

A combination of two outstanding insecticides, methoxychlor and malathion, to give long-lasting control of many insects on flowers, ornamentals, fruit trees, vegetables and shade trees. Safe to use on cucumber, melon, cantaloupe, and other vine crops. 4 oz. bottle \$1.25; 8 oz. bottle \$2.25.

50% DDT Wettable Powder

A highly effective form of DDT for use as spray solution for the control of many insects damaging garden and ornamental plants. May be mixed with most common fungicides. Makes 35 gallons spray solution. 1 lb. can \$1.15.

Acme Tomato Dust

Controls early and late blight as well as hornworms, fruit worms, flea beetles, and other insects and diseases. 1 lb. can 79¢.

50% Methoxychlor Wettable

A residual insecticide which is extremely effective against many insects, and is very safe to handle. Can be used on tender plants such as seedling melons, cantaloupes, etc. One of the most satisfactory insecticides that we have used. Makes 17 gallons spray solution. 8 oz. can \$1.15; 4 lb. bag \$4.00.

Black Leaf 40

A well-known insecticide of many uses as a dust or spray. Contains 40% Nicotine Sulphate. Kills lice and mites on poultry. 1 oz. bottle 49¢; 1 lb. bottle \$2.98.

Du Pont 6% Chlordane

For control of ants, roaches, spiders, crickets, cutworms, snails and other garden and household insects. Dust in seed furrows or along row to control cutworms. 1 lb. can 79¢; 3 lb. bag \$1.50. 8 oz. Duster 89¢.

Red Devil 20% Sabadilla Dust

Non-poisonous to humans. Controls stink bug, squash bug, cucumber beetle, striped blister beetle and other insects. Will not damage plants. Used as dust only. 1 lb. bag 60¢; 5 lb. bag \$2.75.

Acme 5% Lindane Spray

Gives good control against a wide range of insects. Acts three ways—when eaten, by contact, and by action of vapors. Fine for early season sprays of vegetables, fruits, and flowers. 4 oz. bottle 85¢.

Snarol

Contains metaldehyde, the best known slug and snail killer. Lures slugs and snails away from plants and kills fast. Available in meal or pellet form (specify). Also controls cutworms, sowbugs and grasshoppers. 1 lb. 50¢; 2½ lb. \$1.00.

Acme Garden Fungicide

A new insecticide containing 30% Captan and 3% Capryl. Excellent results in control of black spot and powdery mildew on roses and many diseases of certain other flowers, shrubs and ornamentals. Useful on apples, cucumbers and squash. ½ lb. can \$1.40.

Lawntrol

Long-lasting control of ants, pillbugs (sowbugs), cutworms, grasshoppers, armyworms and many other insects. Contains dieldrin, which is fast acting and easy to use. Sprinkle directly from container. Valuable in both garden and lawn work. 1 lb. 69¢; 2 lbs. \$1.25.

Acme 6% Chlordane

Controls ants, chiggers, grubs, cutworms, and many other insects on the lawn, in the garden and in the home. 1 lb. can 65¢.

40% Chlordane Wettable

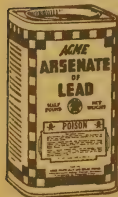

A wettable powder containing 40% chlordane. Used as spray for grasshoppers, ants, cutworms, crickets and other insects. 1 lb. \$1.25.

Fruitone Hormone Spray

A plant hormone spray to stop premature drop of fruit, flowers, and leaves. Also aids pollination and set of fruit of tomatoes. 2/5 oz. pkt. 25¢; 2 oz. can \$1.00.

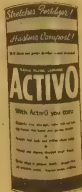

Controls black spot, mildew, rust and red spider. Frequent applications should be made early in the season. Use as dust or spray. 2 lb. can 85¢.

Acme Arsenate of Lead

Widely recommended for control of chewing insects damaging fruit trees, shade trees, vegetables, flowers, berry bushes and ornamentals. 1 lb. can \$1.00.

Active

Makes fertilizer from waste materials and garbage quickly, cheaply and easily. No manure required. Turns garbage into humus without odor in two to six weeks. No. 2 size \$1.00; No. 7 size \$2.95.

Boostabbs

One tablet dissolved in one cup water makes solution ready to use. No powder or liquids to measure. Grows plants 3 to 5 times larger. Not a plant food or fertilizer, but a plant growth stimulator. Gives amazing results. Pkt. (4 tablets) 69¢.

Weedone

Kills lawn weeds, briars, poison ivy, ragweed, poison oak and other weeds and woody plants without killing grass. Not poisonous to humans or livestock and will not sterilize the soil. Apply with any sprayer. 8 oz. can \$1.00.

Vaporette

The safe, easy, economical way to fumigate homes for insects. No more spraying, no work, no oil, no odor, no stain—just light the wick. Vaporette does the trick. Three Vaporettes \$1.49.

Weedone Crabgrass Killer (Contains Sodas)

Here is the newest chemical for the control of crab grass and common chick weed. Also effective on nutgrass, foxtail, witch grass and dallis grass. 4 oz. can \$1.25.

Cyani-Kil Bomb

Cyani-Kil Bomb is an easy, sure, quick method for getting rid of rodent pests such as prairie dogs, moles, field mice, gophers and ground squirrels. Simple to use. Complete directions included. 4 bombs per package 69¢.

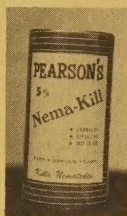

Raponex Rat and Mouse Killer Bait

New type Warfarin prepared bait that destroys rats and mice by causing internal hemorrhage. Gives effective control of rats and mice in homes, barns, feed rooms, chicken houses, etc. Comes in handy feeder packets which need only be cut open and placed in rodent runways. 2 oz. pkt. 25¢; 5 oz. pkt. 50¢.

Pearson's Nema-Kill

A new, granular chemical for effective control of nematodes (very tiny worms in some soils which work on plant roots) in gardens, flower beds, lawns, seed beds, etc. Work Nema-Kill into soil and sprinkle with water to seal gas in soil. Many gardens and flower beds which are useless because of nematode damage can be effectively treated with Pearson's Nema-Kill. Complete directions. 1½ lb. can \$1.59.

Floralife

Floralife adds 3 to 5 days more life and beauty for your cut flowers. Retards wilting and prevents fading. One pkt. makes two quarts of solution. Pkt. 10¢.

Force's Mole Killer

A newly formulated bait now including dried fruits, grain, and vegetables recently found to be readily eaten by moles. Easy to use. Pkt. (35 pellets) 35¢.

Du Pont Spreader-Sticker

A liquid containing wetting spreading and sticking agents. Mixes with most insecticides-fungicides for a more efficient spraying job. 1 oz. can 59¢.

Fumi-Soil

Easy to use, just bury a capsule. Soil moisture slowly releases gas to destroy underground pests such as ants, grubs, larvae, nematodes, centipedes, wireworms and sowbugs. 24 capsules (treats 30 feet of row or 24 shrubs) \$1.45; 100 capsules \$3.95.

Stop-Grass

Saves work of mowing lawn edges. Makes grass stay short for months without trimming. Spray Grass-Stop on grass edges and follow with a single trimming a week later. Grass stays green and short for weeks. 1½ oz. \$1.00.

Acme Fly Bait

Contains 2% Malathion which kills flies quickly. Just shake from can onto floors or other surfaces where flies breed and congregate. 1 lb. carton 80¢; 5 lb. bag \$2.25.

Hotkaps

Hotkaps protect plants and stop weather and insect damage. These wax paper cones form miniature hot houses over plants and help maintain even, warm temperatures. Ground warms around plants much quicker, thus

maturing crops 2 to 3 weeks earlier. They are inexpensive and easy to use. Cut tops out after frost danger is past so that plants may grow normally. Each package contains one fiberboard setter. 100 Hotkaps and Setter \$3.90; 250 Hotkaps and Setter \$7.15; 1,000 Hotkaps and Setter \$19.75.

SPRAYERS AND DUSTERS

Hudson Favorite Sprayer

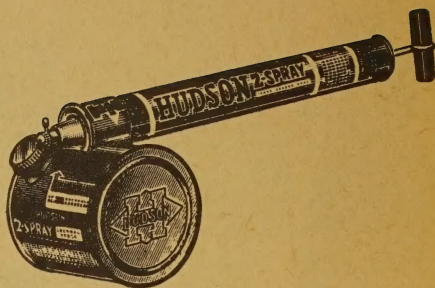

Galvanized steel tank capacity 2 gallons. The Favorite is light in weight, simple to fill, easy to pump up, easy to carry and spray. With its 5 feet of light, flexible plastic hose and adjustable nozzle to give it long reach, the Favorite will do about every spraying job around the house and garden. Complete, postpaid, \$12.50.

No. 4349 Extension Included

Hudson Trombone, Jr. Sprayer

Excellent for small home gardens, yards and all spraying work. Nozzle adjusts from a mist to a 20-foot solid stream at pressures up to 150 pounds. Sprays on both in-and-out strokes. Use any bucket for container. Easy to use and easy to clean. Adjustable nozzle, brass intake strainer. Complete, postpaid, \$7.95.

Hudson Mercury Sprayer

Popular, all-purpose continuous sprayer of one quart capacity. 2-spray nozzle. For control of all types of insects and plant diseases. Complete, postpaid, \$2.30.

ADMIRAL* DUSTER

Design Patent 158734

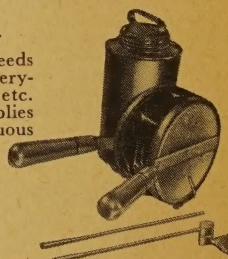

Hudson Admiral Duster

This duster will apply any powder insecticide, fungicide or weed killer. Large plunger makes dusting easy and efficient. Easy to fill, use and clean. Extension tube with swivel nozzle. Complete, postpaid, \$3.00.

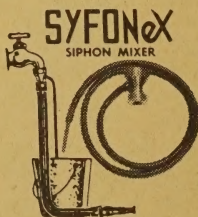

Hudson Dusquik Duster

Exactly meets the needs of home gardeners, nurserymen, truck farmers, etc. Light, easy to use, applies dust either in a continuous cloud or in short puff. Built-in filter scoop under cap, carrying handle. Applies any powder. Complete, postpaid, \$9.90.

Syfonex Brass Siphon Mixer

Solid brass siphon mixer for attaching to garden hose line for spraying soluble fertilizers and other chemicals. Excellent for feeding lawns, or killing weeds as you sprinkle. Connects to faucet or between lengths of hose. Mixes 1 gallon concentrate to 12 to 18 gallons of water while sprinkling. Complete, postpaid, \$2.25.

Du Pont Garden Hose Sprayer

Handles every spraying job. Attaches to garden hose and sprays any chemical that mixes with water. Features handy control valve and two separate nozzles for 4 separate sprays. Sprays up to 30 feet. Complete, postpaid, \$4.95.

Control of Tomato Blossom-End Rot

A serious problem in growing tomatoes is the damage caused to fruits by blossom-end rot. A dry, leathery, brown or black spot on the blossom end (or bottom) of the fruits quickly enlarges, often covering as much as half of the tomato, ruining a large percentage of the crop.

Varying soil-moisture conditions and excess amounts of nitrogen and potash have long been thought to increase blossom-end rot. Recent experiments indicate that the lack of a sufficient calcium supply is also a factor in the cause and increase of this problem.

Addition of liming materials and superphosphates to soil over a period of years will accumulate an adequate supply of soil-born calcium, but as calcium within a plant does not readily move from older tissue to new tissue, additional supplies of available calcium are often required to provide for continual growth of new tissue. This extra calcium can be supplied through the use of a foliar spray as follows: 4 pounds calcium chloride in 100 gallons of water sprayed on one acre. Tests show that this spray can be applied as often as twice a week, and can be mixed with most fungicides and insecticides with satisfactory results. Spraying after a rain is most effective, as rainfall often creates an excess supply of soil salts within the root zone. In areas of very low calcium supply from the soil, weekly sprays will not provide sufficient calcium to control blossom-end rot, but excess spraying can cause leaf burn. Probably, spraying twice weekly until calcium deficiency is balanced would be a good general rule to follow.

Break Your Beet Seed For Better Planting

The "seed-ball" which we normally consider a beet seed is actually dried plant tissue containing several beet seed. For this reason, it is very difficult to plant beets thin enough to develop good, smooth roots. Planting will be easier and more satisfactory if these "seed-balls" are placed in a cloth or sack and hammered or broken into bits before planting.

A Word About Seed Inoculation

Inoculation is the process of putting an inoculating material on seeds or near plants of legumes (peas, beans, vetches, or other plants bearing their seeds in pods), which will cause the formation of nodules on the plant roots and increase the growth of certain bacteria. This bacteria takes nitrogen from the air and "fixes" it in a form which is readily used by the plants. This increase in nitrogen supply gives legumes much greater growth. Nitrogen which the plants do not use will remain in the soil for future use by other legumes. There are two precautions to follow in using inoculants; be sure that the inoculant is fresh, and be sure that the proper kind is used for different crops. It is very little trouble to inoculate legume seed and the cost is very small. It is well worth both the small amount of extra work and expense. Seed may be both inoculated and disinfected immediately before planting. Do not confuse nitrogen fixing nodules on roots with root knot or nematodes. There is no connection between these. Inoculation of seeds other than legumes gives no added advantages.

Herbs For Home Use

Anise, Caraway and Dill are known as "seed herbs," as the seed of these are used in cooking. Basil, Marjoram, Sage and Thyme are known as "leaf herbs," as the leaves, either fresh or dried, are the plant parts used. Leaves should be gathered about the time the plants begin to bloom, washed, and then dried rapidly in a well-ventilated, darkened room, and stored for winter use. Seed herbs should be harvested when plants begin to mature, seeds dried and stored for later use. As some herb seeds are slow to germinate, mixing a few radish seed when planting will mark the row for early cultivation.
